ORDER BLANK

[illegible]

Early in the season we usually have in stock everything listed in this catalogue, but late in the season we frequently run out of some varieties, therefore when you order late state whether we shall substitute something equally as good and as near like variety ordered, or return money for stock that we may be out of. Answer.....

Please give names and addresses of a few of your friends who are interested in and who are buyers of trees shrubs, etc. and we will add some extras to your order.

Name

Address

SPECIAL PREMIUMS FOR EARLY ORDERS

As a rule most people wait until the first warm, sunshiny days of spring before they begin to think of ordering trees, plants and vines. Then they all send in their orders at one time, and to take care of these orders promptly we have to employ extra clerks and packers. If we can induce part or all of our patrons to send in their orders early, we can distribute this work over a longer period of time and not only handle the orders better, but with a much smaller force of men and women. This means a considerable saving of time and money to us, and is **the one and only reason we can make the liberal premium offer as set forth below.**

REMEMBER THE DATE BEFORE THIS OFFER EXPIRES.

For all Spring orders amounting to \$5.00 received before March 15, and for all fall orders received before October 15, we will allow you to select \$1.00 worth of any fruit or shrubbery listed in our catalog. For all orders amounting to \$10.00 we will allow you to select \$2.00 worth. For all \$20.00 orders, \$4.00 worth, and for all \$50.00 orders, \$12.00 worth; for all \$100.00 orders, \$25.00 worth.

BUT NO SPECIAL PREMIUMS GIVEN AFTER DATE GIVEN ABOVE.

KRIDERS APPLE TREES

Price of Apples and Crab Apples	Each	10	100
No. 1, 3-yr., 5 to 7 ft.60	5.00	45.00
No. 1, 2-yr., 4 to 6 ft.50	4.00	35.00
No. 1, 1-yr., 3 to 4 ft.35	3.00	25.00

Apples should be planted in early Spring or late Fall. We recommend April and May for Spring planting; October and November for Fall planting throughout Indiana. The varieties we are offering cover the season from early to late. All of the varieties have been tested and we know that they will prove satisfactory.

Almost any soil will suit the trees; however, best results will be obtained by planting in a rich, loamy soil. Clean cultivation, careful pruning and spraying will pay big dividends. Trees should be planted thirty-five feet apart each way, and for the first year or two the trunks of the trees should be protected from rabbits.

NOTE. We propagate our Apples from scions cut from trees that are bearing fruit. Many nurseries use scions from the nursery rows and trees raised in this manner will not bear fruit until very old. Be sure you get trees that have bearing wood grafted on them.

Apples are going to be valuable in the near future, they bring a handsome price now and when the old orchards are gone they will nearly double the price received now and a good apple orchard will be more valuable than an orange grove. True, some of us will not live to reap the benefits, but our children can not have a greater inheritance than a thrifty, bearing orchard, which will guarantee them a fine income annually.

We grow forty varieties of Apple, each one having certain characteristics which render them valuable. Those marked with an asterisk (*) are such as are most valuable in Indiana.

We can furnish Dwarf Apples at the same price as standard.

A Two-year-old Apple Block at Middlebury

SUMMER APPLES

BENONI. An excellent early apple. Tree vigorous and upright, hardy and productive. A valuable variety for home or market. Flesh yellow, tender, pleasant, sub-acid; good, core small. Last of July and first of August. We consider this one of our most desirable summer Apples; ripens over 3 or 4 weeks' time.

* **EARLY HARVEST.** Size medium, shape roundish, usually more or less oblate, smooth, bright straw color when ripe; flesh nearly white; flavor rather acid; fine. Season, July. Productive. Needs rich cultivation to be fine. Good throughout the North and Southwest.

* **GOLDEN SWEET.** Medium or rather large, roundish, slightly flattened; greenish, becoming pale yellow; flesh very sweet, good, of moderate quality. The fruit is always fair, the tree a free grower, and very productive. Tender for West. August.

* **LIVELAND** (Liveland Raspberry). Color orange yellow, striped, splashed and shaded with red, showing gray dots through the color, flesh light yellow, often stained with red; fine, tender, juicy; core medium open; flavor sub-acid, good.

A fruit tree lasts a life time. A mistake in kind is disastrous. A mistake in quality is costly, why not get Kriders and be sure?

* **RED ASTRACHAN.** Tree vigorous, upright, hardy and productive. Fruit medium to large; surface smooth, marbled and striped on greenish yellow; flavor acid.

* **RED JUNE.** Medium, red; flesh white, tender; juicy, good flavor. Abundant bearer. Last of June.

* **YELLOW TRANSPARENT.** Medium, white, changing to lemon-yellow, smooth waxen surface; of good quality, with crisp flesh; very early, and, for an early Apple, an unusually good keeper. Valuable for market. July and August.

AUTUMN VARIETIES

CHENANGO STRAWBERRY (Sherwood's Favorite). Large, roundish, bright red and yellow; very beautiful and a pleasant Apple. A good and early bearer. September and October.

Wealthy

pecially well in the North. November to January.

FALL PIPPIN. Large, and when fully ripe, a beautiful yellow. Flesh is tender, rich and of good quality; especially good for culinary purposes. Tree is hardy and long-lived. September to December.

* **MAIDEN'S BLUSH.** Of uniformly large size, smooth, round, beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant, but not high flavor. A good market sort because of its attractiveness and the tree's heavy crops. September and October.

WINTER VARIETIES

* **BLACK BEN.** Fall. A beautiful Apple resembling Jonathan although larger and a deeper red; good quality and a good keeper. Tree bears young and carries full crops. This variety often bears at four years of age.

BEN DAVIS (American). Late; fruit round, medium to large; skin yellow, with red stripes; flesh white, tender, juicy, sub-acid. Highly valued variety.

* **BALDWIN.** Large; bright red; crisp, juicy and rich; one of the most popular and profitable sorts for any purpose. Very productive.

* **DELICIOUS.** Fruit, large, nearly covered with brilliant dark red; flesh fine-grained, crisp and melting, juicy with a delightful aroma; of very highest quality. Season, November to February.

* **GRIMES' GOLDEN.** Vigorous grower; large; golden yellow; juicy, sprightly sub-acid of high quality. Tree vigorous; a heavy bearer. Keeps until April.

Grimes Golden

HUBBARDSTON (Nonesuch). This Apple is one of the earliest bearers. Large, striped yellow and red; flesh yellow, juicy and tender with an agreeable flavor of acidity and sweetness; strong grower; bears well every year. November to March.

* **JONATHAN.** A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. November to April.

* **KING.** One of the largest red winter apples. It is of extraordinary size, beautiful in color, attractive, and always brings the highest market price. Its size, beauty and good flavor make it in great demand. November to March.

* DUCHESS OF OLDENBURG.

The best known of the Russian Apples. Succeeds everywhere, even in the Northwest where most varieties fail, and yields well in all sections. Fruit large, rounded, striped with red and yellow; tender, juicy, of the best quality for cooking and esteemed for dessert. Trees bear young, abundantly; very hardy. August and September.

* **WEALTHY.** Hardy, thrifty and good bearer. Fruit medium, roundish, smooth, mostly covered with dark red; flesh white, fine grained, juicy; sub-acid; good quality January. For market, desserts and cooking. See cut page 4.

* FAMEUSE (Snow Apple).

One of our finest dessert fruits. Of medium size, smooth, regular, deep crimson; tender, melting, delightful flavor. The tree is vigorous and hardy, succeeds es-

GAÑO. Similar but superior to Ben Davis. It has all the good qualities in a higher degree, more brilliant coloring, runs more even in size, and keeps fully as late. The tree is vigorous and hardy; is a rapid grower; bears while young. Color bright red.

* GOLDEN RUSSET.

Vigorous growth; medium; russett; crisp, juicy, mild sub-acid; hardy; very good; long keeper. November to April.

Poor Trees are dear at any price.

Delicious

MAMMOTH BLACK TWIG. The tree is a strong grower, a regular and abundant bearer. A good winter apple. Deep red; sub-acid, very high flavored. Keeps until late spring.

* **McINTOSH RED.** Season, December and January. Tree vigorous with spreading head; a good annual bearer. Fruit above medium to large, highly perfumed; smooth polished yellow, almost covered with brilliant solid crimson, a beautiful fruit; flesh snow white, crisp, very tender, sprightly, aromatic sub-acid; very good quality.

* **NORTHERN SPY.** Large, roundish-conical, often flattened, slightly ribbed; handsomely striped with red; flavor rich, aromatic, mild sub-acid, fine. To afford fine fruit, tree must be kept thrifty by good cultivation. A fruit of the highest quality, and profitable for market. December to April.

NORTHWESTERN GREENING. Season, December to March. Tree vigorous grower, hardy. Fruit large; green, becoming yellowish-green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid; very smooth and attractive. One of the best growers we have in the nursery, and in the orchard is very prolific and regular when mature.

* **RAMBO.** Medium, flat streaked red and yellow; very tender, juicy and fine flavored. Tree an upright grower, hardy and productive. October to December.

* **RHODE ISLAND GREENING.** Season, December to March. Fruit large and handsome smooth, dark green overspread with yellow. Flesh tender, rich, rather acid, but highly flavored and excellent. Has long been popular in the Eastern states as a dessert apple and also for cooking; tree vigorous, spreading; a heavy and constant bearer after reaching maturity.

Rome Beauty

itself readily to different soils and situations. Drouth resisting. Season, November to February.

STARK. Large, roundish; golden green, with crimson shadings; flesh yellow, moderately juicy, mild sub-acid. The tree makes a strong growth, bears early and abundant regular crops. One of our best Apples. January to May.

TALMAN SWEET. Season, December to March. Tree of vigorous, upright, spreading and very productive. Fruit above medium; whitish-yellow, often with faint blush on sunny side; flesh white, firm moderately juicy, fine grained, rich and sweet; quality excellent.

* **WAGENER.** Deep red; medium to large; flesh firm; sub-acid, well flavored. Bears young and yields good annual crops. December to March. More suitable for southern than northern Michigan.

* **WOLF RIVER.** Season, October to January. One of the largest Apples grown. Color yellowish-green with stripes and splashes of carmine; flesh nearly white, firm and rather coarse grained; flavor sub-acid, to good. Tree vigorous.

* **WINTER BANANA.** An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates; its wonderful productiveness will bring quicker and larger returns than any other Apple in the orchard.

* **ROME BEAUTY.** Large, roundish, very slightly conical; mostly covered with bright red on pale yellow ground; flesh tender, not fine grained, juicy, of good quality. Ripens early in winter. The large size and beautiful appearance of this Ohio apple render it popular as an orchard variety. Attains highest perfection on medium soils—land neither too rich, nor too poor.

SPITZENBURG — (Esopus). Medium to large; deep red, high flavored; valuable for commercial purposes. November to April.

* **STAYMAN'S WINESAP.** Most profitable market variety. It has large size, bright red color, great productiveness and best quality to commend it. The tree is a vigorous grower, is irregular and drooping in habit, and adapts

The fruit has a richness of flavor that cannot be described. Flesh golden yellow, fine grained.

* **YORK IMPERIAL.** This is a fine, hardy, large red, winter apple. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. Good shipper, bringing highest prices.

* **YELLOW BELLEFLOWER.** Season, winter. A hardy apple of large size, a beautiful golden color, often with red blush; conical in shape.

CRAB APPLES

Prices of all varieties same as standard Apples.

For preserves, jelly, flavoring, canning, Crab Apples are very good. Also their tartness is agreeable once in a while when they are eaten fresh. The trees themselves are beautiful and when loaded with the bright colored fruit, are striking. They are an ornament to any grounds and look well beside the finest ornamentals.

HYSLOP. Large; dark crimson, with bloom; very showy. Tree very hardy; late.

TRANSCENDENT. The largest Crab Apple. Red; showy; excellent. September to October.

* **RED SIBERIAN.** Large, red-striped. Fine for cooking; very hardy.

* **YELLOW SIBERIAN.** Beautiful glossy yellow, shaded bright red; good size, clear, tart. October.

The Krider Nurseries:

Just a line in regards to the apple trees and all other nursery stock I purchased from you a few years back. The apple trees all had apples on the third year after planting. Also the strawberry and raspberry plants turned out wonderful."

M. C. Plisky, Indiana

Another View of Our Splendid Nursery.

LET US FIGURE.

A good strong No. 1 tree will cost, let us say one dollar. A slightly inferior tree may cost let us say again 65c, a saving of 35c per tree or about \$14.00 on an acre apple orchard.

Let us agree that both the good tree and the poorer one will bear equally as soon after planting. Same cost of upkeep and cultivation.

But which tree will bear the more fruit? Do you have any doubt that the good thrifty tree will not bear many times more fruit than the difference in the original cost; that the acre orchard will bear \$14.00 more fruit?

Figure It Out for Yourself.

The Krider Nursery Co.:

"The trees I received from you November 7 were the kind of stock I have been paying \$1.50 and \$2.00 each from several Nursery Companies the past two years and fully intend to get a larger order from you this fall. I have tried all this fall to get someone to clear some new ground and nobody wanted the job, so I will try again this winter for to plant in the spring. One of the orders will be for some early pears as I think you have the best there is anywhere as I have looked in some half dozen catalogs this spring."

Yours truly,

Jas. A. Cook, Indiana.

WE PROPAGATE FROM BEARING TREES. THEY BEAR YOUNGER.

CHERRIES

Price of cherry trees	Each	10	100
First Class, 5 to 7 ft. $\frac{3}{4}$ to 1 inch.....	1.00	9.00	75.00
Second Class, 4 to 5 ft. $\frac{1}{2}$ to $\frac{3}{4}$ inch.....	.90	7.50	60.00
Third Class, 3 to 4 ft. $\frac{3}{8}$ to $\frac{1}{2}$ inch80	6.00	50.00

In planting a Cherry orchard care should be taken not to plant the trees too close together; select a dry soil for the Cherry, as a rule, although it is so hardy a tree that it will thrive in a great variety of soils, yet a good sandy, or gravelly loam is best. Use same care in planting as other trees.

Orchardists are resorting more and more to the planting of varieties of Cherries that are strong pollenizers. Experience seems to demonstrate that such varieties as Black Tartarian, Bing, and Schmidt's Bigarreau are the best varieties to use for this purpose. Usually about one in every ten trees has proven to be the right proportion to use of these pollenizers.

DUKE AND MORELLO (Sour)

DYEHOUSE. This variety partakes both of the Morello and Duke wood and fruit. A very early and sure bearer; ripens a week before Early Richmond, is of better quality and productive. Free. May and June.

EARLY RICHMOND. Everywhere the most popular. Tree strong, thrifty grower, making a large symmetrical head; fruit medium size, dark red, melting, juicy; sprightly acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season last of May and first of June.

LARGE MONTMORENCY. A fine, large, light red Cherry of the Richmond class, but larger and more upright grower, equally hardy and productive. Second only to Early Richmond in value. Ripens ten days later.

MAY DUKE. A large, light red cherry of most excellent quality. They are between a sweet and a sour cherry. Fine for canning. The tree is a strong, upright grower.

ENGLISH MORELLO. Medium to large, roundish; dark red, nearly black when ripe; flesh purplish-red, meaty, juicy, slightly astringent and good; very productive. August.

SWEET VARIETIES

BING. This grand new black Cherry was originated by Seth Lueling, of Milwaukee, Ore. Almost as large again as the Black Republican; flesh very solid, flavor of the highest quality; tree thrifty, upright grower, very hardy and productive; a fine shipping and market variety. First of July.

BLACK TARTARIAN. Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. June.

SCHMIDT'S BIGARREAU. The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper. July.

WINDSOR. Tree upright, vigorous and a rapid grower; fruit large, roundish, oblong; very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; has attracted attention owing to its large size and dark color; almost black. July.

GOVERNOR WOOD. Large, heart-shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety that is still a favorite in many regions.

NAPOLEON OR ROYAL ANN. A beautiful cherry of large size; pale yellow with bright red cheek; flesh firm, juicy and sweet; one of the best for market and canning.

A thrifty vigorous tree is a joy to its owner.

PEARS

The soil should be rich and well cultivated. They should be pruned every year, dwarfs especially. Dwarfs should have low heads and be trained in a pyramidal form, one-half of the previous season's growth being cut off each Spring.

Pears succeed best on rather steep hillsides. Plant Pears midway on the slope, putting something else on the upper and lower sections. Cultivate sparingly, so as to induce a very slow growth, and let blue grass take the land before the trees come into fruitage. When blight appears, cut off the affected parts at once and burn them; cut six inches below the lowest blight, to insure taking all infected sap.

Price of pear trees	Each	10
Select 5 to 7 ft90	8.00
Select 4 to 5 ft.80	6.00

EARLY VARIETIES (Summer and Fall)

Flemish Beauty

FLEMISH BEAUTY. One of the best varieties of pears, on account of its hardiness. The tree is a strong grower, an annual and abundant bearer, and is usually successful over a large range of country. The fruit is large; the skin pale yellow; the flavor is sweet and melting. Ripens in September and October.

WINTER PEARS

GARBER. Equally as hardy as LeConte or Kieffer; of same class of Pears. The growth and appearance are very much like Kieffer; ripens one month sooner and of better quality.

LINCOLN CORELESS. Originated in Lincoln County, Tenn. Fruit very large, handsome appearance, good quality and very few, if any, seeds. Almost clear of core and seeds, whence its name. One of the best keepers among Winter Pears. Golden yellow; tree a good grower and very productive. Has never been known to blight.

KIEFFER'S HYBRID. Originated near Philadelphia. Supposed to be a seedling of a Chinese Sand Pear crossed with the Bartlett. Size large, very handsome; skin yellow with a bright vermilion cheek; very juicy, with a musky aroma; quality good when ripened to perfection. Rather coarse grained, but one of the best Pears for canning or preserving. A very young and prolific bearer. As near blight-proof as a Pear can be called.

DUCHESS D' ANGOULEME. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

SHELDON. A large, round, russet and red pear of very rich fine quality, melting, and delicious. Tree vigorous, bears well. October.

BARTLETT. Large size, with beautiful blush next to the sun; buttery, very juicy and high flavored; tree a strong grower and a young and abundant bearer. August and September.

CLAPP'S FAVORITE. Large obovate, ovate; skin thin, pale yellow, marked with crimson and fawn colored dots, flesh white, fine grained, juicy, buttery, rich, melting and sweet. Very vigorous, upright grower. August and early September. Very desirable in all sections, and especially so where all other varieties fail.

SECKEL. (Old Fashioned Sugar Pear.) Our most highly flavored Pear. Fruit small, yellowish brown, with a russet-red cheek; flesh very juicy, melting, aromatic, with a rich spicy flavor; quality very best.

Bartlett

PLUMS

No other fruit tree, unless it is the cherry, will produce more abundantly than a plum tree. Although they will yield crop after crop despite neglect, plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of plum production has received much attention in late years but the supply still falls far short of the demand. In general, plum trees thrive best in a sandy or clayey soil. A distance of 16 to 18 feet apart is considered the best for plum trees with the distance increased to 20 feet where a wagon spraying outfit is used. Many varieties of plums produce so abundantly that the best results will be obtainable only by careful thinning. If allowed to grow naturally the trees will be weakened and the quality of the fruit will be inferior. We can recommend to the planter the following varieties:

Price of plum trees	Each	10	100
Number 1, 5-7 ft.90	8.00	70.00
Number 1, 3-4 ft.80	6.00	50.00

ABUNDANCE. A nearly pinkish red Plum; ripens in midseason. Thrives everywhere. A regular and heavy bearer. No orchard complete without it.

BRADSHAW. A very large and fine early plum, dark violet red juicy and good. Trees erect and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety.

BURBANK. Adapted to any soil and climate where any other Plum is grown. A profitable commercial Plum. Requires little care. Ripens in midseason.

LOMBARD. Medium; violet-red; juicy, pleasant; adheres to stone; valuable market sort; hardy, productive.

MONARCH. Fruit dark purple, covered with a thin bloom; large size specimens measuring six inches in circumference; flesh pale greenish yellow, parting freely from the stone; juicy, with a pleasant flavor. A leading market sort. Vigorous grower. September.

MOORE'S ARCTIC. Small, purplish black, juicy, sweet, immense bearer; one of the hardiest in bud and bloom. September. Excellent for home use.

REINE CLAUDE. Small; yellow-green; flesh pale green, melting, luscious and of best quality. Mid-August.

SHIPPER'S PRIDE. Large and handsome, dark purple; quality fine, juicy and sweet; excellent for canning. September.

SHROPSHIRE DAMSON. One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

WICKSON. Large, heart-shaped; dark red, thick bluish bloom; flesh yellow, solid, meaty, sweet, cling; growth upright.

YELLOW EGG. Very large, egg-shape. Color creamy yellow, flesh yellow and of fine quality. A good variety for the Middle West. Ripens end of August.

Mr. Krider in Our Plum Block. Note Size of Trees.

A Quarter Century of Quality Stock at Fair Prices.

PEACHES

Price of Peach Trees		Each	10	100
No. 1,	4-6 ft.35	3.00	25.00
	3-4 ft.25	2.00	18.00
	2-3 ft.20	1.80	15.00

The Peach holds a place second only to the apple in the United States. It ripens over a long period and with proper selection of varieties a succession of fruit may be had throughout the Summer and early Fall. In a general way it may be said that the standard varieties of Peaches have a wider range of adaptability than the majority of apples and thrive on thinner soils; for example: Elberta is the leading variety in all the Peach growing sections of the country—but no single variety of apple trees occupies the same position in its class as does Elberta. This fact is ample proof of the adaptability of the Peach.

PARADICHLOROBENZINE. A sure cure for the peach borer. This remedy can be purchased from your druggist. If applied in September the following directions should be followed.

Remove the dirt from about the tree in a circle of 12-inch radius, apply paradichlorobenzine in a circle about 4 inches from tree using a tablespoon to a 5-year tree, cover by mounding the dirt about the tree. The gas resulting from this preparation is a sure cure for the borer and will prolong the life of a peach tree 5 years.

EARLY AND MID-SEASON VARIETIES

BIG RED (Free Stone). Larger than Elberta. Rich red all over, flesh yellow, rich, fine grained and juicy. Stands shipping well. Tree hardy, vigorous grower, having large spread. Ripens middle of Sept.

CARMAN. In this new, hardy, rot-proof Peach, almost as large and fine as the Elberta itself, we have a Peach of great market value; a large, roundish Peach, with pale yellow skin, red blush on sunny side; white flesh; tender and melting; rich, sweet and superior flavor. A big, early, yellow-skinned Peach of high quality is sure to be in great demand. August.

Carman

CHAMPION.

(Free). Large, round quite regular; yellowish-white, mottled with red on sunny side; flesh white with red at the pit; one of the best in quality. For near-by market and home use it is the best variety we know of. Tree is a good, healthy grower and one of the hardiest in fruit bud. Fruit ripens from 20th of August to first of September.

CROSBY (Free). Medium to large, orange-yellow splashed with red; flesh yellow, red at pit; juicy and rich; tree hardy and prolific; fruit should be thinned in order to make good sized peaches; a popular market sort; middle of September.

CRAWFORD'S EARLY (Free). Large, roundish, bright yellow with red cheek; flesh yellow, juicy and sweet; quality good. August and September.

EARLY ELBERTA (Free). Larger than Elberta, though identical in form; bright yellow with red blush; flesh yellow, finer grained and sweeter than Elberta; ripens a week to ten days before Elberta; good shipper. Tree strong grower, hardy, good bearer. Last of August.

ELBERTA (Free).

The great market Peach perfectly hardy in the North and is believed by many growers to be the best all around Peach; color lemon-yellow with blush on sunny side; flesh pale yellow, tender and juicy; tree vigorous; a good shipping Peach. September.

Elberta

The Krider Nurseries:

"Please pardon my delay in writing to thank you for the Los Angeles Rose which I received last week. I want to say it surely is appreciated."

Mrs. J. H. Bixler, Ohio.

Gentlemen:

"I received the shrub and thank you for sending me such a lovely big bush."

Mrs. R. O. Lane, Kentucky.

Kalamazoo

J. H. HALE (Free). Fruit averages one-third to one-half larger than Elberta; ripens about five days earlier and is much superior in flavor. Color a beautiful golden yellow with deep carmine blush. Seems to do well over a wide range of territory. It is well worth planting. September first.

KALAMAZOO (Free). Medium to large, oval; yellow striped with red and a thin bloom; flesh yellow, red at the pit, rich, vinous and of good quality. A valuable sort. September first.

J. H. Hale

LEMON FREE (Free). Large, roundish, often with pointed apex; light yellow with greenish-white tinge and thick bloom; flesh yellow, tender and good; a good canning sort. September.

ROCHESTER (Free). Early midseason. Color lemon-yellow changing to orange-yellow, blushed with deep, dark red. Skin thick, tough. Flesh yellow stained with red near the pit. Very juicy, tender and melting. Sweet. Highly flavored. Very good in quality.

SOUTH HAVEN. The great hardy peach for cold regions, stands 10 degrees colder weather than any other peach grown. Large, yellow, free stone. Large as Elberta and a week earlier on the market. Of all peaches for Indiana markets, this rules supreme. Plant for commercial purposes. South Haven, Elberta, J. H. Hale. All yellow, all free stone, all money makers.

KRIDER'S LATEST

JAPAN DREAM. This is the earliest freestone Peach grown in Indiana. Very sweet, tender and excellent flavor; ripens before Champion. Brought to northern Indiana by Mr. D. A. Davis. We only have a limited number and offer them at 75c each; 5 for \$3.00. Not more than 5 to a customer.

LATE RIPENING

SALWAY

HEATH CLING. Very large; flesh white, juicy and melting. Good keeper and shipper. Ripens in October.

SALWAY (Free). Large, roundish, deep yellow with rich red cheek; flesh yellow, firm and juicy; sugary; a valuable late market sort. First of October.

Scrub live stock is fast disappearing. It did not pay. Neither does Scrub Nursery Stock.

The Krider Nurseries, Inc.

"I received peach trees all O. K. and shrub. My husband was pleased with the trees and said they certainly had fine roots and were fine trees."

Era M. Carter, Ohio.

CRAWFORD'S LATE (Free). Large, roundish-oval, yellow with broad red cheeks, flesh yellow with red at the pit; melting, vinous and very good. Late September.

GOLD DROP (Free). The almost translucent golden colored flesh of this Peach renders it exceedingly attractive in market, where it sells at highest prices. The tree is hardy and bears early; profitable. Late Sept.

APRICOT TREES

Prices of all varieties of Apricot trees	Each	10
Largest size 2 yr. 4 to 5 ft.90	8.00
Medium size 2 yr. 3 to 4 ft.80	6.00

Ripening as it does between Cherries and Peaches, usually about the month before the early peaches, the Apricot is a most welcome fruit, both tempting and delicious. No garden should be without a few trees. In addition to its value as fresh fruit it is a superior fruit for canning and drying, vast quantities being used for these purposes every year. There is always a market for Apricots at good prices, and the planter need have no fear of over production.

ALEXANDER. Russian, an immense bearer. Fruit large, oblong, yellow, flecked with red; sweet and delicious.

BUDD. Russian. Large, white with red cheek; sweet and juicy; strong grower, good bearer. Late.

GIBB. Russian. Medium yellow, sub-acid, rich and juicy, the best early sort.

MOORPARK. One of the largest and finest Apricots. Yellow with red cheek. Flesh orange, sweet, juicy and rich; parts from the stone. Very productive.

SUPERB. Russian. Medium, roundish oval, smooth, light salmon with numerous red or russet dots, flesh yellow, firm, sub-acid and good; tree hardy and productive; middle of July.

Superb Apricots

QUINCES

Quince trees can be planted on low, damp, heavy soils where other fruits do not thrive. They require very little attention and are very profitable for market. No home garden is complete without a few Quince trees.

PRICE OF QUINCE TREES

Champion and Orange, 2-yr., 4 to 5 ft. Each \$1.00; Dozen \$10.00.

Champion and Orange, 2-yr., 3 to 4 ft. Each 80c; Dozen \$9.00.

CHAMPION. Good bearer; very large; good keeper; very productive. Bears extremely young.

ORANGE. (Apple). Large; bright golden yellow; excellent flavor. Fine for domestic use. October.

GRAPES

Why not set a vineyard this Spring? No fruit yields greater returns on the investment than Grapes. Prices the past year have been from 5 to 6 cents per pound and returns have been as high as \$600.00 per acre. Give that boy a chance. Set 8 feet apart in rows 10 to 14 feet wide. About 600 vines will set an acre.

Price No. 1 vines, each 20c; per doz. \$2.00; per 100 \$10.00. All vines heavy, two years old.

RED VARIETIES

AGAWAM. Bunch large shouldered; berry large, reddish brown, tender, vinous and of excellent flavor. Very vigorous and productive and one of the best of its class.

BRIGHTON. Bunch large, shouldered; berries medium to large, round dark red, tender, very little pulp, sweet, juicy, slightly aromatic and very good. Ripens early.

CATAWBA. (Red) Bunch medium, shouldered; berries large, deep copper-red, becoming purple when ripe; flesh somewhat pulpy, juicy, sweet, aromatic and rich; one of the latest, does not ripen well in the North.

DELEWARE. The bunches are small, compact, and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table use and for wine. Ripens with Concord or a little before; vine is hardy, productive and a moderate grower.

Agawam

SALEM. Bunch large and compact; berry large, of a light chestnut or Catawba color, thick skin, perfectly free from hard pulp; very sweet and sprightly with a most exquisite aromatic flavor; as early as Wordens; keeps well.

WHITE VARIETIES

Niagara

***NIAGARA.** Occupies the same position among the white varieties as Concord among the black. Bunch and berries large, greenish white, changing to pale yellow when fully ripe. Skin thin but tough; quality much like the Concord.

***POCKLINGTON.** Seedling from the Concord. The vine is thoroughly hardy both in wood and foliage; it is a strong grower, never mildews in vine or foliage. The fruit is a light golden yellow, clear, juicy and sweet to the center, with little or no pulp; bunches very large, sometimes shouldered; berries round, very large and thickly set. Ripens with the Concord.

MOORE'S DIAMOND (White). A vigorous grower, entirely free from mildew and a prolific bearer; bunches large and compact, slightly shouldered; color delicate greenish-white with yellow tinge when ripe; berries tender, juicy and nearly transparent, sweet and rich; ripens about two weeks before Concord.

Grapes require little care after they are once in bearing. The cost of a vineyard is small at the prices Krider sell them. Why not put out a vineyard this year? In three years a crop.

BLACK VARIETIES

CAMPBELL'S EARLY. A new, very large and fine early black Grape. Strong, vigorous hardy vine with thick, healthy leaves; clusters very large, usually shouldered, compact and handsome; berries large, nearly round, black, rich, sweet, very good; skin thin; seeds few and small, parting easily from the pulp; good shipper; Ripens very early but remains sound on vines for many weeks. This makes it one of the most satisfactory and profitable market sort to grow.

***CONCORD.** One of the most popular and reliable varieties we possess; bunch large, compact and shouldered; berry large, round, almost black with blue bloom, juicy, buttery and very sweet.

MOORE'S EARLY. A large Grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early Grape.

WORDEN. Seedling of the Concord which it greatly resembles in appearance and flavor, but the berries are larger. The fruit is said to be better flavored and to ripen several days earlier. These qualities will give it the foremost rank among native Grapes.

RASPBERRIES

Per 25, \$1.00; per 100, \$3.00; per 1000, \$18.00.

Loose soils produce the best Raspberries. Partial shade is no hindrance to productivity, as the natural habitat of the Raspberries is in lower ground, filled with leaf mold and partly shaded. For this reason along higher fences and in between the young orchard trees, Raspberries are likely to thrive. Allow not more than five good canes to develop to the plant, and pinch out the tops of these when they attain a height of 2½ to 3 feet in order to encourage laterals.

Both pink and black Raspberries are sold only in bunches of 25 plants. Less than this number is hardly worth the trial.

BLACK VARIETIES

CUMBERLAND. Largest black Raspberry known; unusually strong grower, perfectly hardy. The most profitable Raspberry grown.

GREGG. Extra big, enormously productive. Hardy; firm black meaty berries. Late ripening and firm for shipping.

KANSAS. Originated at Lawrence, Kans. Healthy, vigorous grower; early; berry is as large as Gregg and as good a shipper. Very productive and valuable for early market.

QUILLEN. This variety originated a few miles south of Indianapolis and has proven to be more disease proof than other varieties of blackcaps. The largest and most prolific of all blackcap varieties; a cross between Cumberland and Hopkins. Ripens a little later than Cumberland, Kansas and Gregg. We highly recommend this variety.

Per doz., \$1.00; per 100, \$5.00.

Quillen

Weak plants are dear at any price.

RED VARIETIES

Per 25, \$1.25; per 100, \$4.00; per 1000, \$25.00
By parcel post, 15c per 50 additional.

CUTHBERT. Crimson, large, conical, firm and juicy. The canes are upright, strong and vigorous. Hardy. The standard late red market and home variety that is popular and unsurpassed.

KING RED. Bright scarlet, sweet and melting. This early red is the best of this season because of hardness, productiveness and general good qualities. Ripens two weeks before Cuthbert.

ST. REGIS. The so-called ever-bearing. It does produce some berries throughout the Summer, and in the Spring is an excellent producer. Quality very good.

ERSKINE PARK. Everbearing large, deep red, bears all summer, very fine flavor, good market variety. You'll want some of these in your patch.

COLUMBIAN. The Columbian is a new variety of the Shaffer type, of remarkable vigor and productiveness, propagates from tips. Fruit very large, often an inch in diameter, shape somewhat conical, color dark red bordering on purple; adheres firmly to the stem and will dry on the bush if not picked; seeds small and deeply imbedded in a rich juicy pulp with a distinct flavor of its own. Succeeds wherever red sorts do well and promises to become the leading variety. A most delicious table berry. Per 25, \$1.50; per 100, \$5.00.

YELLOW VARIETIES

GOLDEN QUEEN. Large beautiful translucent, amber color, and exceptionally firm; very productive. The canes are of the strongest growth and quite hardy. The delicacy of flavor is remarkable, comparable only to fragrance of dew drenched wild flowers. No berry equals it for table use.

The Krider Nurseries:

"Please quote me prices on 1-year-old Concord grape vines for spring delivery. The vines bought from you a few years ago have produced excellent crops."

Lyle W. Smith, Indiana.

BLACKBERRIES

Blackberries do best on good soil, clay and sand mixture preferred, set in rows 6 feet apart and 2 feet in the rows. 3,500 are required per acre. Blackberries are in great demand now at 20c per quart. Give the boy a chance to try his mettle by letting him start a patch. He won't have any desire to leave the farm if he is successful in raising fruit. The varieties here given are perfectly hardy and will prove a source of profit. Beware of the Erie, Wilson, Jr., Lawton and their like; they will not stand our Winters.

SNYDER. The leading variety here; needs no protection, is rust proof and will stand more neglect than any other variety. In fact it is at its best in sod or shade. Per doz., 75c; per 100, \$3.00; per 1000, \$20.00.

ELDORADO. Largest hardy Blackberry grown. Free from rust and the best money maker here. Berries of the Eldorado bring 50c per crate more than Snyder on the local market. Per doz., 75c; per 100, \$3.00; per 1,000, \$20.00.

BLOWERS. Very large, finest flavor and jet black. Canes grow upright, perfectly hardy. This variety is one of the most productive under cultivation. Begins to ripen in July and continues late. Sells for highest market price. Per doz., 75c; per 100, \$3.00; per 1000, \$20.00.

CURRANTS

The Currant is an indispensable garden fruit. It is very largely planted all over the North, and owing to its early ripening season it is grown successfully as a commercial fruit in all sections. An acre of currants properly cared for will produce from one thousand to twelve hundred dollars worth of fruit annually. Currants are more easily handled than other small fruits, as they hang on the bushes from ten days to two weeks after they become ripe, without injury.

CHERRY. Bush vigorous, stocky and compact; cluster rather short, fruit medium large; color bright red; very thin skin; juicy and fine flavor; one of the most productive. Each 20c; \$15.00 per 100.

FAY'S PROLIFIC. Berry averages large, juicy and less acid than Cherry; bush not quite so strong a grower. Each 20c; \$15.00 per 100.

LONDON MARKET. Bush vigorous, upright; fruit medium to large; color dark red, with sprightly acid flavor; very productive. Each 20c; \$15 per 100.

PERFECTION. The latest introduction, being a cross between Fay's

Prolific and White Grape, combining the best qualities of both. Berry bright red and large. The clusters average longer and the size of berry is maintained to the end of bunch. In quality it is said to be superior to anything in the market today, being a rich, mild sub-acid flavor with plenty of pulp and few seeds. Each 25c; \$18.00 per 100.

POMONA. Fruit of good size and flavor; bright red; has long stems and hangs in fine condition after ripening; is a good shipper; bush bears early and is wonderfully prolific; a good market sort. Each 20c; \$15.00 per 100.

RED CROSS. One of the later introductions. A strong growing variety with long clusters. Berry medium to large, bright red. Of mild and pleasant quality and fine flavor. Each 20c; \$15.00 per 100.

BLACK NAPLES. Large, black, rich, tender; excellent for jellies and wine; very productive. Each 20c; \$15.00 per 100.

BLACK CHAMPION. A variety from England. One of the best black currants yet introduced. Bunches very large, excellent flavor, strong grower and very productive. Each 20c; \$15.00 per 100.

WHITE GRAPE. Bush vigorous, somewhat spreading, productive; clusters long; berries large; of very attractive color, mild flavor and good quality; a good table variety. Each 20c; \$15.00 per 100.

GOOSEBERRIES

This fruit is very useful for cooking either green or ripe, and is used for canning extensively. Requires the same cultivation and treatment as currants. The surest method to prevent mildew is to plant thickly in the rows and mulch deeply, six or more inches, with straw, tan bark, coal ashes, etc. Plantations thus treated have borne large crops for twenty years. The mulch retains moisture in the driest weather; the few weeds that push up are easily pulled, and the fruit is large and more evenly ripened. Price all varieties except Chautauqua. Each 25c; \$15.00 per 100.

DOWNING. Fruit large, round, light green with distinct veins, soft, juicy and fine flavored; vigorous and productive; smooth skin; one of the best.

HOUGHTON. Medium size, pale red, sweet and juicy; vigorous grower, abundant bearer and free from mildew.

INDUSTRY. One of the best English varieties yet introduced; berries very large, dark red, hairy, rich and agreeable; bush vigorous and a great producer.

JOSSELYN (Red Jacket). Large size, smooth and excellent quality; very hardy and a wonderful cropper.

CHAUTAUQUA. Light yellow, largest size, 1 to 1½ inch in diameter; very sweet and delicious. 50c each.

ASPARAGUS

The first garden vegetable of Spring; it is a great delicacy and comes in just when it is most needed. One hundred roots will supply a small family and will last for years. Set the plants about eighteen inches apart in the row. Spread the roots out in the bottom of the hole or furrow and gradually fill in as the plant grows, so that the roots will be about four inches deep.

	Each	doz.	100
Asparagus—Two Years Old		3.00	15.00
Buckbee's Perfection	.25	3.00	15.00
Bonvalet's Giant	.25	2.00	10.00
Early French Giant Argenteuil	.20	2.00	10.00
Improved Palmetto	.20	2.00	10.00
Columbian Mammoth White	.20	2.00	10.00
Conover's Colossal	.20	2.00	10.00

RHUBARB

VICTORIA. The old standard variety, large stalks; medium season. Per doz., \$1.00; per 100, \$5.00.

LINNEAUS. One of the leading varieties grown here. Stalks not as large as Victoria, but earlier. Per doz., \$1.00; per 100, \$5.00.

MILLER'S CREAM. For many years an old market gardener near Bristol had the early trade of Elkhart on pie plant; he had the largest, earliest and the best flavored pie plant that came to the city. Pies made from it had the flavor of peaches and it was called peach flavored. Since his death we have succeeded in obtaining the entire stock and have at this time 10,000 stalks. We are offering this to our customers at the same price as the common kind. \$1.00 per doz.; \$5.00 per 100. Be sure and send for a dozen of this variety in your order. We call it "Miller's Cream" and will give \$25.00 for a dozen stalks that will excel it in size, season and quality.

STRAWBERRIES

"I must tell you from the 540 Dunlap Strawberry plants we got of you we picked nearly 900 quarts of berries. I don't think we ever had a crop we enjoyed so much."

Mrs. Rose Richard, Indiana

THE QUALITY OF STRAWBERRY PLANTS

In looking through the many catalogs you receive you will notice that many claim to be the largest growers of plants, and their plants are the best grown. We do not claim to be the largest grower of plants or that they are better than some others, but we have bought plants from some that make such claims in different parts of the country and have never received any better than we send out. In some cases we had to throw away half of the plants as they had the crowns broken or were so small that they were not worth planting. We *guarantee* the plants we send out to be as large and as fine as you get anywhere (no matter what you pay), and to be put up in as good condition and if grown side by side, under like conditions, that they will produce as much and as good fruits.

COLOR SYSTEM. We use a different color of warp for each variety of Strawberry plants, thus assuring you an easy way of keeping the varieties separate when they are unpacked.

Prices of Strawberries 75c per 100; \$5.00 per 1000.

SPRING BEARING VARIETIES

Aroma (Per). Large; dark red; uniformly roundish, heart-shaped; flesh firm and of very good quality. Stands shipping well; plants vigorous and very productive; blossoms rich in pollen and is good fertilizer for imperfect varieties. Late.

Senator Dunlap

Bubach (Per.) Very prolific, excellent flavor and large size. A number of new varieties have been pitted against it, claiming superiority in one way or another, but Bubach is among the best and continues to grow in favor.

Charles I. Probably the largest and most productive Strawberry grown. Quite dark red color. A very firm fruit and for delicacy of flavor it has no equal.

Dr. Burrill (Per). Fruit is large, beautiful, dark red in color, and of excellent flavor.

Shape similar to the Senator Dunlap and ripens at the same time as the Dunlap; great canning berry. It is an excellent berry for the home garden or for the market. No better.

Gibson. This is the most popular Strawberry extant today. Best for market and best for the home garden. Berry large; dark glossy, red, nearly round, very productive. Plant Gibson and success will be yours.

Senator Dunlap (Per). This berry is of the Warfield type has a perfect blossom, is hardy, productive, a splendid keeper and able to hold its own under any "rough and tumble" methods of culture to which it is likely to be subjected. It is a very heavy bearer of good size even fruit of a very beautiful dark red color. It is a berry to grow for either home use or market.

Warfield (Per). There is probably no better or more profitable berry grown for market. It is in greater demand than any other berry for canning purposes, which also creates a good market for it. Care should be taken to use the right berries as fertilizers. It needs a strong pollinizer.

"What profit may be had from an acre of strawberries?" We are often asked. That will depend on the season, the soil and market price as well as upon the care given by the grower. From reports we get from our customers we should say from \$400 per acre to \$1,200.00 is a fair average. Some won't do so well, some will do better. But, here is the point, what will an acre of wheat, or clover or corn make? Why not vary the crops and add to the income. The supply never equals the demand here.

The Krider Nurseries:

"I have received the Strawberry plants and they were very nice and in good condition. Enclosed find check for \$21.00, the price of the Strawberry plants as listed in your catalog. Thanking you for your kindness in holding back the plants for me until the weather conditions were right, I remain,

Yours truly

W. Scott Welch, Indiana.

PREMIER

(Per.). This new variety has in the space of a few short years, become the most popular early Strawberry known.

Until the advent of the Premier it seemed almost impossible to find an extra early Strawberry that was satisfactory in every way. The main qualifications for a good profitable Strawberry were lacking. Either they were too soft, ripened with green tips, were of poor color and quality, or the berries became small in size after two or three pickings.

All of these faults are now eliminated in the Premier. While it is the first variety to ripen it is of long fruiting season, and holds its size and uniformity to the last picking.

Berry has a rich, glossy appearance, being of a bright red clear through to the heart. It is slightly tart in taste and of such firm texture that it carries well to the most distant markets. Added to these qualifications its large and generally attractive appearance make Premier a variety sought after in all markets.

It is a strong pollenizer, vigorous grower and heavy producer. Being easy to grow it is one of the safest and most profitable Strawberries to plant, assuring one of success.

EVERBEARING STRAWBERRIES

We have been growing Everbearing Strawberries for 12 years and have tried 12 varieties. We have eliminated all but three. These have given excellent results. They will yield as much as the common varieties in June and will produce well all Summer and Fall.

Many people make a mistake in growing only one variety. Like the common varieties, Fall bearers do best if two varieties are planted together.

Try Champion and Indiana. Money back if not satisfied.

Premier

Champion

Champion (Per.) This berry is a seedling of the Dunlap. Dark red in color and immensely productive. Bear thirty days after planting and continues to bear until the ground is frozen up in the Fall. All through August, September and October the vines are filled with one mass of ripe berries. Per doz. 75c; per 100, \$3.00; per 1000 \$20.00.

Indiana (Per.) One of the largest of the Everbearers—bears the same season and ripens earlier than Champion. Is dark red with bright yellow seeds, making a fine showy appearance. Very productive. Per doz. 75c; per 100, \$3; per 1000 \$25.00.

Superb (Perfect). Plants are strong and stand the winter well after pro-

ducing a heavy crop from about August 15th to November, according to season. The fruit of Superb is very large, round, rich, dark colored, glossy, attractive and smooth. Each berry is of good shape and ripens all over at once.

Progressive (Perfect). The berries are not as large as Superb, but of equally good quality, and they yield well and, we think will be one of the best known varieties of fall bearers in a few years. Fruit of Progressive is of good size, smooth, of good color and appearance. Per doz. 50c; per 100, \$2.00; per 1000 \$18.00.

Progressive

MAKING THE HOME BEAUTIFUL

More attractive homes! Homes larger, better built, more convenient, more attractive. Not only for more heat, more light, more comfort, but also for more beauty.

When God made this country it was a place of trees, shrubs and flowers. Today men are beginning to realize that God's way is the best and everywhere men and women are striving to retain as much of that former beauty as they can. Parks and reserves for everybody, playgrounds for children, green lawns and shrubs and trees and flowers. Civic centers for making better citizens.

Your own home, too, may be likewise a center of beauty at how small a cost many people do not realize. A little loving care is the largest item. Making the desert blossom like the rose is figurative, but making the home grounds more attractive is one step in the process.

PLANTINGS BY OUR LANDSCAPE DEPARTMENT.

Residence of C. B. Isabell, Elkhart, Indiana.

A TWO-FOLD OBJECT

Landscaping has a two-fold object—beauty and utility. The plan must provide for pleasing views, beautiful foliage and charming flowers, the whole making a harmonious picture. It must also provide for convenient walks and drives, ease of handling, and, not the least important, economy of space.

Everyone has noticed the common way of breaking up the open, grassy spaces, and spotting them with individual shrubs and flowers of all kinds, of laying out drives and walks with useless crooks and turns, with no attempt to shut out unsightly objects. These common errors will be avoided by the use of a well defined plan. As a matter of fact, it is just as bad to set out grounds without a plan as to begin building a home the same way. It is not necessary to do all the planting at one time, or in one season; the owner may complete the plan at his own convenience.

Garden of C. B. Isabell, Elkhart, Indiana

FREE LANDSCAPE SERVICE

You may say that you do not know what to plant, that you would like to do something if you only knew what. One purpose of our landscape department is to meet just such emergencies. We are pleased to offer you the services of trained men to advise what to plant to best bring out the full beauty of your house and grounds. No job too small for our attention, no job too large for our facilities to handle.

Some one has said that as we pass through this world only once, each one of us should leave the world a better place in which to live. Certainly planting a tree, setting a shrub or making flowers bloom in a harmony of color is one way to make the world a better and more beautiful place in which to live.

Write us today for your needs.

Send in a drawing of your house and yard showing walks and drives and we will submit you a plan. For this service you send us \$2.00 and when you order this will be deducted from the amount of your bill provided it amounts to \$25.00 or more.

Robert Baker Garden, Goshen, Indiana

SHADE TREES

ASH (*Fraxinus*)

EUROPEAN, MOUNTAIN—A fine, hardy tree; heads dense and regular, covered from July till Winter with great clusters of bright red berries. 6-8 ft. \$2.00; 8-10 ft., \$3.00.

BEECH (*Fagus*)

PURPLE-LEAVED—Discovered in a German forest. An elegant tree, growing 20 to 30 feet high. Foliage a deep purple, changing to crimson. Like all varieties of the Beech, this is difficult to transplant, hence small trees 3 feet high are preferable. 3 to 4 ft., \$8.00 each; 6 to 8 ft., \$12.00.

BETULA—THE BIRCHES

BETULA ALBA (European White Birch). A graceful tree with silvery bark and slender branches. Very effective when grouped with evergreens. 6-8 ft., \$2.50.

A. LACINIATA PENDULA (Weeping Cut-leaved White Birch.) Undoubtedly one of the most popular of all weeping trees; tall and slender, graceful drooping branches, silvery white bark, delicately cut foliage. A well known favorite of great beauty. 6-8 ft., \$5.00.

THE CATALPAS

Catalpa Bungei

Very valuable for poles, posts and railroad ties. 6-8 ft., \$1.00; 8-10 ft., \$1.50.

CATALPA

BUNGEI (Chinese Catalpa.) Umbrella-like head only three or four feet high and twice as broad, forming a pretty dome-shaped head of great, soft, leathery leaves. It is very desirable when grafted on stems five to six feet high for border along drive, walk or around a park where you do not desire tall trees. 3 yr. head, \$3.50; 2 yr., \$2.50.

C. SPECIOSA (Western Catalpa). Very hardy. Rapid grower. White flowers in late spring.

CERCIS

(Judas Tree or Red Bud). A medium sized tree with large, irregular head. Profusion of reddish-pink blossoms in early spring before foliage appears; one of the finest ornamental trees. 6-8 ft., \$2.50.

ELM (Ulmus)

AMERICAN—A noble native tree of large size, wide-spreading head and graceful, drooping branches. One of the grandest park and street trees. 8 to 10 ft., \$2.00 each; 2 in. \$5.00 each; 3 to 4 in., \$10.00 each.

MULBERRY (Morus)

TEA'S WEeping RUSSIAN—A weeping variety of the new well-known Russian Mulberry; perfectly hardy in Summer and Winter; withstands extreme heat and cold and grows naturally in a very graceful form. 2 yr., 4 ft., \$2.50.

MAPLE (Acer)

NORWAY—A native of Europe; a large, handsome tree, with broad, deep green, shining foliage. The handsomest and one of the most desirable trees for street, park or lawn. 6-8 ft., \$2.00; 2 in. \$3.50.

SUGAR OR ROCK—A very popular American tree, and for its stately form and fine foliage justly ranked among the very best, both for lawn and the avenue. 8 to 10 ft., \$2.00 each.

Norway Maple

SCARLET—A rapid-growing tree with red flowers which appear very early in the Spring. 8-10 ft., \$2 each.

SILVER—A hardy, rapid-growing native tree of large size. Valuable for producing a quick shade. Excellent for street planting. 8 to 10 ft., \$1.50; 6 to 8 ft., \$1.00.

ASH-LEAVED (Box-Elder)—A fine, rapid-growing variety with handsome light green foliage and spreading head; very hardy; desirable for street planting, and succeeds in many sections where other varieties of Maple will not thrive. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

JAPAN—Foremost among ornamental stock are the Japanese Maples which, for beauty of coloring, are unsurpassed. They are yearly gaining in favor, and for effective grouping in landscape gardening are invaluable and unrivaled. Strong plants in fine assortment, including varieties with finely cut, bright and dark red, yellow and green and variegated leaves. 2 to 3 ft., \$10.00.

WIER'S CUT-LEAVED MAPLE. A beautiful tree of graceful, half drooping habits. Leaves finely cut and luxuriant. One of the best of the ornamental trees. 6-8 ft., \$1.50; 8-10 ft., \$2.50.

Silver Maple

POPLAR—(Populus)

Lombardy—Well known for its erect, rapid growth and commanding form; very desirable in large grounds and along roads to break the average height and forms of other trees. 8-10 ft., \$2.00; 6-8 ft., \$1.50.

SYCAMORE

Oriental Plane—A lofty, wide-spreading tree; heartshaped leaves; valuable for its handsome foliage and free growth; not so subject to disease as our native species. Entirely free from worms and insects. One of the oldest cultivated trees known. One of the best and most popular for street and avenue planting. 6-8 ft., \$1.50.

SALIX—THE WILLOWS

Salix babylonica (Weeping Willow). The well-known common Weeping Willow; makes a large tree with drooping branches. Very fine for planting on the margin of streams and ponds. 6-8 ft., \$1.50.

S. elegantissima (ThurLOW's Weeping Willow). Strong upright, with smaller branches drooping; puts out early and has good foliage through the season; probably the best Willow. 6-8 ft., \$2.00.

S. vitellina (Yellow Barked Willow). Erect in growth. Bark very yellow or golden color. 6-8 ft., \$2.00.

S. Wisconsin (Wisconsin Willow). A large tree with long, drooping branches, similar to babylonica, but much harder. 6-8 ft., \$1.50.

TULIP TREE

Liriodendron tulipifera. One of the grandest of our native trees. Of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves, and beautiful tulip-shaped flowers. 6-8 ft., \$2.50.

ORNAMENTAL HEDGE

A small amount of money invested in beautiful hedges will add more value to a country or town home property, dollar for dollar, than any other similar investment without exception. A hedge planted about the borders of a lawn will transform a heretofore bare looking spot into a place of beauty; and you can keep it low or let it go high, as a screen. City lots may be divided by hedging with fine effect. In dozens of different ways, which suggest themselves to the property owner, hedging may be used with great profit. A hedge is easily set, a little care will keep it in perfect condition, and it is a wonder that more are not planted.

Amoor River Privet Hedge

LIGUSTRUM (Privet)

AMURENSE (Amoor River Privet)—A valuable ornamental shrub for hedging and borders. Very hardy foliage; glossy green, and holds its color almost the entire year. Will stand clipping to any extent. 1-yr., \$5.00 per 100; 2 yr., \$10.00 per 100; 3 -yr., \$15.00 per 100.

IBOTA (Chinese Privet)—A native of China and Japan. Foliage long and shining; flowers large, white and fragrant. Valuable for its flowers and foliage. 1-yr., \$5.00 per 100; 2-yr., \$10.00 per 100; 3-yr. \$15.00 per 100.

Ligustrum Regelianum (Regels). The horizontal, sometimes drooping branches are distinctly beautiful. The plant is dense and compact, growing to 6 or 8 feet. Blooms in June and July, and has berries like preceding. 1 yr., \$5.00; 2-yr., \$10; 3-yr. , \$15.00.

BERBERIS (Barberry)

1-yr., \$10.00 per 100; 2-yr., \$25.00 per 100; 3 yr., \$40.00 per 100.

THUNBERGI (Japanese Barberry)—This is a low shrub, with brown, horizontal branches growing so thick and matted that, even though the leaves fall in Winter, the hedge still is dense. Add to that the appearance of the bright scarlet berries growing almost as thick as leaves and fresh till Spring and you have an idea of its Winter garb. In the summer there are hosts of little pale yellow flowers among small, round foliage.

EVERGREEN HEDGES

ARBOR VITAE makes a neat beautiful hedge. It stands trimming well. Especially effective in winter. Get our 100 rate.

NORWAY SPRUCE for Hedges and wind brakes. Special prices by the 100.

SHRUBS

Both shrubs are the same grade as to height—3 to 4 feet—the one on the right has been grown in the nursery two years longer than the one on the left. When you buy shrubs at cheap prices you may get the height but you do not get the fine bushy plants. We do not sell one-year shrubs.

Rice School 6 Months After Planting.

CONIFEROUS EVERGREENS

Evergreens are always in favor for landscape work, their different colored foliage making a strong background for the brilliant colors of Summer, but it is in Winter, when the Northern landscape is barren of color and foliage, and the beauty of the Southern greatly lessened, that they are most appreciated, the absence of other colors tending to bring out the beauty of form in a most striking manner.

Our Conifers are grown in the most careful and scientific manner. We transplant them several times before allowing them to go out to our customers, insuring a strong fibrous root growth. Trees that have not been several times transplanted and become acclimated to our climate are almost sure to die. See cuts of our evergreens on page 21.

CAUTION. Do not buy cheap Evergreens. Unless they have been treated as above stated you will be disappointed with results.

Do not let the sun or wind strike the roots of Evergreens even for a few minutes; you will kill them if you do. Every Conifer offered in this catalog, unless otherwise stated, is taken from the field with the roots securely closed in a ball of earth and this bound on with a piece of burlap. The roots are never exposed. When you receive the plants, have hole ready, remove burlap (but not dirt), plant immediately, water thoroughly, but do not apply over foliage.

Planting Made for Dr. Dugdale, So. Bend, Ind.

ABIES (The Firs)

3ft., \$8.00; 5 ft., \$15.00

Trees are generally pyramidal in shape and hardy everywhere. The needles are short and generally bright on the under side. They transplant kindly and should be more generally used. They are nearly all native of the northern country and more handsome in cultivation than in their native soil.

DOUGLAS (Douglas Fir)—A cone-shaped tree of very light bluish green foliage, even lighter on under side. Very desirable.

ARBOR-VITAE

AMERICAN—One of the finest Evergreens for hedges. It grows rapidly and soon forms a most beautiful hedge; very dense. Of course it is never adapted to turn stock, but it forms a most desirable and ornamental screen to divide the lawn from other parts of the ground. 2 ft., \$3.00; 3 ft., \$5.00.

GOLDEN—A beautiful variety of Chinese Arbor-Vitae; compact and globular; color a lively yellowish green; not quite so hardy in the North, should be planted in a shady situation, where it will give a brilliant touch of color like sunshine. 18-24 in. \$3.00.

PYRAMIDALIS—An exceedingly beautiful, bright variety, resembling the Irish Juniper in form; foliage a deep green, color well retained in Winter; perfectly hardy. Should have a place in every collection. 2 ft., \$3.00; 3 ft., \$5.00.

COMPACTA—Foliage light green; habit dwarf and compact. Fine for small places. 12-18 in. \$2.00; 18-24 in. \$3.50.

PEABODY GOLDEN—Very beautiful globe shaped, attaining size of a bushel basket. 12-18 in., \$2.00.

TOM THUMB—Small compact, with feathery foliage. A beautiful ornament for small yard or cemetery lot or low hedge. 12-15 in., \$1.75; 15-18 in., \$2.00; 18-24 in., \$3.00.

GLOBOSA—Forms a dense, low, globe shape. A beautiful Evergreen. Particularly fine for formal plantings. 12-18 in., \$3.00; 18-24 in., \$4.00.

HOVEY'S GOLDEN—A small tree, globular in form; foliage light green with a golden tinge and very compact; hardy. 12-18, \$2.00; 18-24 in. \$4.00.

JUNIPERUS (Junipers or Cedars)

This family embraces many different forms and characters. They are pyramidal, erect and spreading; foliage varying in color from light to dark green, to gold and blue. They possess the vigor to establish themselves in any type of soil and will thrive in clay, stony and poorer soils where some Evergreens may fail. Seem to withstand the soot and dust of our cities better than the general Evergreen family. They make a sparse root system requiring extra care in planting and until established. The needles are short and slightly prickly.

VIRGINIANA (Red Cedar)—A well known native tree; varies much in habit and color of foliage; very attractive in Winter when the golden bronze of the young growth contrasts with the dark green of the older. 3 ft., \$5.00; 5 ft. \$12.00.

Residence of James Boyer, Elkhart, Ind.

Plan and Planting Furnished by us.

GLAUCA (Grey Cedar)—Similar to Red Cedar in form and of a soft-blue-green color; closely columnar. 3 ft., \$5.00.

HIBERNICA (Irish Juniper)—Of slender columnar habit with glaucous green foliage. Useful formal plantings. 2 ft., \$3.00; 3 ft., \$5.00.

PFITZERIANA (Pfitzer Juniper)—A graceful, broad, pyramidal Evergreen with sweeping fronds of gray-green foliage, making in time a distinctive, beautiful tree. 2 ft., \$5.00.

SABINA (Savin Juniper)—Especially suitable for hillside planting or among rocks; like a prostrate shrub in habit, and useful for all low planting. The foliage is deep green and unchanging in its color. 1 ft., \$2.50; 2 ft., \$5.00.

Propogating Frames and Green House

PICEA (The Spruces)

These are all easy to transplant, and the most popular of the Evergreen family. They are perfectly hardy and grow rapidly and are pyramidal in shape, used for specimens, in groups or for foundation adornment, and as screens, wind-breaks or hedges they are equally appropriate. Needles are uniformly short. We have a fine stock of sheared plants that will please every purchaser.

COLORADO BLUE (*Picea pungens glauca*)—This species has been tested at various points on the prairies of the West and Northwest with perfect success, enduring a temperature of 30 degrees below zero in exposed situations, entirely uninjured. This is not only one of the hardiest, but the most beautiful in color and outline; of a rich blue or sage color; it is a valuable acquisition. 2 ft., \$7.50; 3 ft., \$12.00.

HEMLOCK (*Tsuga canadensis*)—An elegant pyramidal tree, with drooping branches and delicate dark foliage, like that of the yew. Distinct from all other trees. It is a beautiful lawn tree, and makes a highly ornamental hedge. 2 ft., \$5.00.

Blue Spruce in Our Nursery.

NORWAY—A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich, and as it gets age, has fine, graceful, pendulous branches; it is exceedingly picturesque and beautiful. Very popular, and deservedly so. One of the best Evergreens for hedges and windbreaks. 1 ft., \$1.00; 2 ft., \$2.00; 3 ft., \$3.00; 4 ft., \$4.00; 5 ft., \$5.00.

PINUS (Pines)

Pines seem to grow anywhere, high or low ground, exposed or shaded position, in rich or poor soils, they are at home. After established they grow rapidly and when given space quickly raise their heads and spread their great branches, soon making a wonderful tree. The needles are invariably long and with age droop gracefully. Plant any kind and be assured of getting quick results.

AUSTRIAN OR BLACK (*Pinus Austriaca*)—A remarkably robust, hardy, spreading tree, leaves long, stiff and dark green; growth rapid; valuable for this country 2 ft., \$3.00.

SCOTCH (*Pinus Sylvestris*)—A fine, robust, rapidly growing tree, with stout, erect shoots and silver green foliage. 2 ft., \$3.00.

WHITE (*Pinus Strobus*)—The most ornamental of all native Pines; foliage light, delicate, or silvery green. 2 ft., \$3.00.

MUGHO (*P. Mugho*)—This is an excellent dwarf Pine, being globe shaped and erect branching when the new growth which seems like miniature candles completely covers the bush. 1½ to 2 ft., \$3.00; 2 to 3 ft., \$6.

RETINISPORA

FILIFERA (Thread-branched Retinispora)—Of unique and showy habit, always noticeable. The leading shoot grows upright, the branches are nearly horizontal, with long, drooping, tasseled ends; pyramidal in outline, bright green. 2 ft., \$5.00.

PISIFERA (Pea-fruited Retinispora)—Erect branches, pendulous at the tips; foliage feathery, light green, glaucous beneath. 2 ft., \$5.00.

PLUMOSA (Green Retinispora)—Densely conical, with fern-like leaves of bright green, carried on erect, plummy branches. 2 ft., \$5.00.

PLUMOSA AUREA (Golden Retinispora)—One of the few really golden Evergreens. The color of the young growth contrasts strongly with the darker shade of the older foliage. Striking and useful in many ways. 2 ft., \$5.00.

VINES AND CREEPERS

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to verandas. Hardy vines practically take care of themselves after they are once established and are much more desirable and less trouble than annual or tender varieties.

IVY—(Ampelopsis)

Virginia Creeper, or American Ivy (*A. quinquefolia*.) A perfectly hardy, rapid climber, with large, five-lobed leaves which change to bright scarlet or crimson in autumn. 50c each.

Var. Engelmannii. Shorter jointed and having finer foliage than *Quinquefolia*. Clings to brick or stone. A good grower and hardy. The best for the North and Northwest. 50c each.

Boston, or Japan Ivy (*A. Veitchii*). From Japan. It is a splendid plant for covering any object, as it clings perfectly to the smoothest surfaces. The foliage is a bright glossy green, changing to bright tints of scarlet, crimson and orange. Kills back, some in a cold, dry climate. 50c each.

ARISTOLOCHIA

Dutchman's Pipe (*A. Siphon*). A native species of climbing habit and rapid growth, with magnificent light green foliage, ten to twelve inches in diameter, and curious, pipe-shaped, yellowish brown flowers; a splendid variety for archways or verandas. 50c each.

CLEMATIS

A beautiful class of climbers, many of the varieties with flowers 5 to 7 inches in diameter. Excellent for pillars or trellises; or when used for bedding, running over rock work or an old tree stump, they make an excellent show. They delight in a rich soil, a sunny situation; perfectly hardy.

Duches of Edinburgh—A free-flowering, double white variety, with medium-sized flowers. \$1.00.

Henryi—Fine large, creamy white flowers. A strong grower and very hardy, one of the best of the white varieties; a perpetual bloomer. \$1.00.

Jackmani—The flowers when fully expanded, are from 4 to 6 inches in diameter; intense violet-purple, with a rich velvety appearance, distinctly veined. It flowers continually from July until cut off by frost. \$1.00 each.

C. Madame Edouard Andre. Flowers large, of a beautiful, bright, velvety red; free-flowering and a continuous bloomer. \$1.00 each.

Paniculata, or Sweet-Scented Japan Clematis—A Japanese plant possessing unusually attractive merit. A vine of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy green foliage. The flowers are of medium size, pure white, borne in immense sheets and of a most delicious and penetrating fragrance. The flowers appear in September, at a season when very few other vines are in bloom. 50c each.

HONEYSUCKLE (*Lonicera*)

Chinese Twining (*Lonicera Japonica*)—A well-known vine, holding its foliage nearly all Winter. Blooms in July and September, and is very sweet. 50c each.

Common Woodbine (*Lonicera periclymenum*)—A strong, rapid grower, with very showy flowers, red outside, buff within. June and July. 50c each.

Hall's Japan (*Lonicera Halliana*)—A strong, vigorous evergreen variety, with pure white flowers, changing to yellow. Very fragrant; covered with flowers from June to November. 50c each.

WISTERIA

Chinese Purple (*Wisteria Sinensis*)—A most beautiful climber of rapid growth, and producing long, pendulous clusters of pale blue flowers. When well established it makes an enormous growth; it is very hardy; and one of the most superb vines ever introduced. The very best vine to grow when it is desired to have it shade the upper part of the house, as its heaviest growth is at the top. 50c each.

A Well Matured Planting

HARDY ORNAMENTAL SHRUBS

Its not a home until its planted. Just a little shrubbery adds a touch of beauty. It has been said that we may doubtless live as long without beauty around the home but just as doubtless not as happily.

By carefully selecting different varieties of shrubs a succession of bloom may be had throughout the season. Shrubs give you not only the cool green of foliage but the flash of colorful blossoms.

ALMOND

Double-Flowering. A most desirable early-flowering shrub, with white and pink flowers. 2-3 ft., 50c; 3-4 ft., \$75c.

ALTHEA—(Rose of Sharon)

Unsurpassed by anything in the hardy shrub line for freedom of bloom or range of color. From midsummer until frost, when few other shrubs are in bloom, the Althea is most handsome, with its large camellia-like flowers of the most varied and beautiful shades.

Double White. White, with crimson center.

Double variegated. Pink and white.

Double Purple.

Double Blue. Deep blue.

Double Red. An excellent striped variety, nicely marked white and rose.

2-3 ft., \$35c; 3-4 ft., 50c.

Althea—Rose of Sharon

ARALIA

Aralia Pentaphylla. A pretty medium sized shrub. Holds leaves until late in Fall. Valuable for screen planting. Flowers inconspicuous. 18-24 in., 50c; 2-3 ft., 75c.

Spinosa (Hercules Club.) A large shrub with stout prickly stems and compound leaves, flowers creamy white in huge panicles sometimes 2 feet long, followed by dark purple berries, giving a tropical appearance to landscape planting. Very good. 4-5 ft., \$1.50.

AZALEA

Mollis. A beautiful species recently brought from Japan; it has fine, large trusses of flowers in shades of pink and yellow; requires some protection. 18-24 in. \$3.00.

BUDDLEIA—(Butterfly Bush)

Buddleia Veitchi Magnifica. A very attractive new addition to the flowering plants. While a perennial in habit, yet because of its vigor and size, it is used largely in shrub plantings. The tops in severe Winter will freeze back, but it pushes with such renewed vigor this is not harmful. The flowers are borne on the tips of every bit of new growth, and in August the plants are masses of purple and violet flowers, very conspicuous, that attract butterflies. 2-3 ft., 50c; 3-4 ft., \$75c.

BERBERIS—(Barberry)

Berberis Thunbergi (Japanese Barberry). Low, compact growing shrub much used for border or hedge planting. Can be trimmed for formal planting. Small flowers in May followed by abundance of berries which turn to deep scarlet in Winter. The fine green foliage turns to a brilliant red in Autumn. Very attractive. 12-18 in., 25c; 18-24 in., 50c.

Berberis—(Barberry)

BECHTEL'S DOUBLE FLOWERING CRAB

A sturdy grower, hardy and a medium size, flowers large, double, resembling double pink roses; are very fragrant when in bloom, looks like mammoth rose bush blooms young, 2-3 ft., \$2.50.

CALYCANTHUS (Sweet Scented Shrub)

The old-fashioned Sweet Shrub with a rare and peculiar fragrance of wood and flowers; an abundance of chocolate colored flowers in June and at intervals afterward. Foliage rich dark green. 12-18 in. 35c; 19-24 in. 50c.

CHIONANTHUS

Chionanthus virginica (White Fringe). A very desirable shrub for its white blossoms which make it seem a cloud of snowy lace against the deep green foliage. A fine shrub for specimen planting. 2-3 ft., \$1.00.

CLETHRA

Clethra alnifolia (Sweet Pepper Bush). A very valuable shrub for border planting on account of abundance of sweet-scented white flowers. Adapted to wet and shady places. 18-24 in., 50c.

COLUTEA

Colutea arborescens (Bladder Senna). A rapid-growing large shrub with light green foliage. Yellow flowers in June followed by showy red pods.

CORNUS—DOGWOOD OR OSIERS

This group of shrubs is adaptable for use in border and screen plantings. Attractive flowers. Abundance of berries and highly colored foliage in autumn. The twigs are a bright color in winter time.

Cornus—Dogwood or Osiers

Cornus elegantissima variegata (Variegated Dogwood). Fine variegated shrub, leaves broadly margined with white. 2-3 ft., 75c.

C. paniculata (Gray Dogwood). A very useful variety for screening purposes. Flowers white, fruit white on bright red stems. 18-24 in., 35c; 2-3 ft., 50c.

C. sibirica (Red Twiggled Dogwood). With small clusters of white flowers, its blue berries and its dark red bark, this is one of the most attractive shrubs, 3-4 ft., 50c.

C. stolonifera var. aurea (Golden-barked Osier). Bright yellow twigs. Makes an attractive combination with Red-twiggled Dogwood. 3-4 ft., 50c.

CRATAEGUS—HAWTHORN

Crataegus oxyacanthus var. coccinea flore pleno (Paul's Double Scarlet Thorn). The best of the double varieties. A small ornamental tree. Flowers a bright carmine-red; superior to any of its color. 2-3 ft., 50c.

CYDONIA—JAPAN QUINCE

Cydonia japonica. Brilliant flowering shrub covered with scarlet flowers early in the spring. Good for massing. 18-24, 35c; 2-3 ft., 50c.

DEUTZIA

One of the finest of shrubs for abundance of pretty blossoms which cover the plants in early Spring. Can be used in borders, mass or specimen planting. Very good.

D. crenata flore pleno. Flowers double, white, tinged with rose, blooming in late June. Very hardy. 2-3 ft., 35c; 3-4 ft., 50c.

D. gracilis. Of dwarf habit. Flowers pure white. One of the first to bloom. Fine for edging in front of taller shrubs. 18-24 in. 50c.

D. lemoinei. Flowers pure white; shrub medium and free-flowering. Excellent for forcing. 2-3 ft., 35c; 3-4 ft., 50c.

D. Pride of Rochester. Produces large double white flowers tinged with rose. Profuse bloomer. One of the best. Flowers early. 2-3 ft., 35c; 3-4 ft., 50c.

Dainty Deutzia

EXOCHORDA GRANDIFLORA

Pearl Bush—It grows vigorously to a height of 6 to 10 feet. The early buds look like pearls strung on slender threads. May opening them up to long, gleaming sprays of pure white. 2-3 ft., 75c.

ELAEAGNUS (Oleaster)

Angustifolia (Russian Olive)—15 to 25 feet. A very large shrub or small tree; the leaves are narrow and silvery white in color; blossoms are small; yellow and very fragrant; perfectly hardy. 3-4 ft., 60c.

Longipes (Silver Thorn)—4 to 6 feet. Of dwarf, spreading habit; foliage dark green above, silvery white beneath; small yellow flowers; fruit oblong, bright red, covered with small white dots, and is edible. Valuable on account of ornamental character of the fruit. 3-4 ft., 50c.

ELDER—(Sambucus)

Common Elder (S. canadensis)—A large, showy shrub, very ornamental in foliage, fruit and flowers and blossoming in June; flowers white, borne in large panicles; fruit reddish-purple berries in the fall. 3-4 ft., 35c.

Elder, Golden (Sambucus nigra aurea)—A handsome shrub, with golden yellow foliage and clusters of pure white flowers. Excellent for lawn planting. 3-4 ft., 50c.

The Krider Nurseries:

"I received the three trees O. K. and thank you for them. I am thinking of placing a nice order of various kinds of fruit trees with you people next spring."

Frank Pittman, Indiana.

A Field of Our Hydrangeas

EUONYMUS (Strawberry Tree)

Alatus—(Cork-barked Euonymus)—Very attractive in Autumn when full of bright colored fruit and brilliant crimson foliage. Bark very corky. 2-3 ft., 75c; 3-4 ft. \$1.00.

FORSYTHIA

(Golden Bell.) These splendid old shrubs growing 8 to 10 feet tall eventually, light up the garden with glinting masses of yellow, very early in spring before leaves appear. The upright forms make excellent tall hedges, and are bright-hued fillers for massed shrub groups.

Intermedia. The earliest blooming. 2-3 ft., 35c; 3-4 ft. 50c.

Viridissima. Twisted flowers. Not dependable for hardiness in northern latitudes. 2-3 ft., 35c; 3-4 ft., 50c.

Fortunei. The most upright in growth. 2-3 ft., 35c; 3-4 ft. 50c.

HAMAMELIS

Virginiana (Witch Hazel). Has a wealth of delicate yellow flowers appearing in late Fall. Exceptionally beautiful at the edge of a wood or along woodland paths. 2-3 ft., 50c.

HYDRANGEA

Hydrangea Arborescens

Arborescens (Snowball Hydrangea.) Has the appearance of a low-growing snowball with its large clusters of white flowers. Particularly desirable on account of coming into bloom before the *H. paniculata*. Its blooming period is from early June until middle of August. A very desirable shrub. 12-18 35c; 18-24, 50c.

Paniculata Grandiflora. One of the most popular shrubs in cultivation blooming at a time when few shrubs are in bloom. Flowers borne in huge panicles from 8 to 12 inches long, delicate pink changing to brown. Very desirable. 12-18 in., 35c; 18-24 in., 50c.

Tree Hydrangea. This is the *Paniculata Grandiflora* with all its beauty of great clusters of blooms in tree shape. Will grow 10 to 12 feet high. 2-3 ft., \$1.50.

KERRIA—Corchorus (Globe Flower.)

An attractive shrub with slender green branches and showy yellow flowers. It thrives in almost any well-drained soil. Hardy, but benefited by protection from cold winds in severe climates.

Japonica. A slender green-branched shrub covered with single yellow flowers from July to October. 18-24 in. 50c.

The Krider Nurseries:

"My order for trees and vines arrived O. K. and must say they look good to me. Also I want to thank you for your promptness in shipping this order. It meant much to me as I am leaving in a few days for Florida.

Williard Schanck, New Jersey.

HONEYSUCKLE—(Lonicera)

These vigorous tall growing shrubs are invaluable for screening and massing effect, with their dense green foliage and showy red berries appearing in Summer and continuing until early Fall. They are one of the most desirable shrubs. Fine for tall hedges. Can be kept trimmed.

Tatarica Rubra (Red Tartarian)—A beautiful shrub. Vigorous and producing large, bright red flowers, striped with white, in June. Very desirable. 2-3 ft., 35c; 3-4 ft., 50c.

Tatarica Alba—A large shrub having white flowers in May and June. 2-3 ft., 35c; 3-4 ft., 50c.

Morrowi (Japanese Bush Honeysuckle)—A spreading variety growing 4 to 6 feet tall; blooms early in spring, pure white, followed by pretty red berries. 2-3 ft., 50c.

LILACS

The lilacs are well-known, beautiful shrubs, indispensable in every collection.

Charles the Tenth—A strong growing bush producing loose trusses of reddish purple flowers which fade to mauve. 3-4 ft., \$1.00.

Frau Bertha Dammann—Single; large panicles of pure white flowers. Very fine variety. 3-4 ft. \$1.00.

Ludwig Spaeth—One of the darkest shades, very dark crimson-purple. Single. \$1.00 each.

Persian Lilac (*S. Persica*)—Grows 4 to 6 feet high, foliage small and flowers a bright purple. 3-4 ft., 75c; 2-3 ft. 50c.

President Grevy—Double. Clusters large, full; pale wisteria-violet. 2-3 ft., 75c.

Purple Lilac (*S. Vulgaris*)—The well-known purple variety; always a standard sort. 2-3 ft., 50c.

Villosa—Late blooming lilac. Flowers large, light purple in bud, white when open, fragrant. Does not grow high. Height 5 to 8 feet. 2-3 ft., 50c.

White Lilac (*S. Vulgaris Alba*)—Too well-known to need description; flowers white and fragrant. 2-3 ft., 35c.

MAHONIA (Ashberry)

Aquifolia (Holly-leaved Mahonia)—A native shrub; very handsome, with purplish shining prickly leaves and bright yellow flowers in May, followed by bluish berries. Very ornamental. 12-18 in., \$2.00 each.

PHILADELPHUS (Mock Orange or Syringa)

This old-fashioned shrub with creamy white flowers borne in clusters is found in many plantings. There are many varieties that offer a wide range of size and blooms. All varieties are strong growers and are suitable for border, screen or specimen planting. We have a few new varieties that are exceptionally fine and you will be highly pleased with them. 2-3 ft., 35c; 3-4 ft., 50c.

Avalanche—A graceful shrub with slender arching branches covered with white flowers. One of the best.

Coronarius (Garland Syringa)—Pure white; very fragrant flowers. One of the first to bloom.

Coronarius Var. Aureus (Golden-leaved Syringa)—A beautiful shrub with golden yellow foliage. Keeps its color the entire season. Splendid for grouping with other shrubs in border planting.

Gordonianus (Gordon's Syringa)—A vigorous grower and profuse bloomer. White flowers; fragrant and late.

Grandiflorus (Large-flowered Syringa)—Has large showy flowers, somewhat fragrant. Bark reddish. A rapid grower.

Lemoinei (Lemoine's Syringa)—A graceful shrub with very rich foliage and large pure white fragrant flowers in June.

Mont Blanc—A charming variety; dwarf in habit with very large fragrant flowers produced in great abundance.

Philadelphus Virginal—The newest and loveliest of the Syringeas. Blossoms are as large as a dollar, waxy white and continue all summer. Nothing before ever like it. Special one to a customer, 2-3 ft., \$1.00 each.

MAGNOLIA

Magnolia, Glauca. (Sweet Bay). When planted in moist soil this makes a handsome tree, 30 to 40 feet high. Its leaves are glossy, laurel-like, almost evergreen. In June its pure white flower cups are lovely and fragrant. 2-3 ft., \$4.00.

Tripetella. Spreading tree, beautiful and glossy. An ornament to every yard. 3-4 ft., \$6.00.

PRUNUS (Plum)

Triloba (Double-flowered Plum)—A very desirable addition to the hardy shrubs. Flowers double, delicate pink and thickly set on long slender branches. Blooms in May. 2-3 ft. \$1.50 each.

Pissardi (Purple-leaved Plum)—This is the finest purple-leaved tree or shrub. In the Spring the leaves are crimson, changing to dark purple as the season advances. This splendid color maintained until the leaves drop in the Fall. 3 to 4 ft., \$1.50 each.

Syringa

RHAMNUS (Buckthorn)

Catharticus (Common Buckthorn)—8 to 10 feet. A very useful hedge plant. Foliage dense and dark green. Has attractive white flowers in June and July. 18-24 in., 50c; 3-4 ft., 75c.

RHUS (Sumac)

The Sumacs as a class appeal to the planter most for the wonderful Fall coloring of the foliage.

Cotinus (Purple Fringe)—Better known as Smoke Tree. Flowers in loose panicles which become purple and give tree a smoky appearance in early Fall. Foliage of bright green and glossy color. 2-3 ft., \$1.00.

Glabra (Smooth Sumac)—10-15 ft. One of the best of the Sumacs to produce natural effects. 3-4 ft., 50c.

Laciniata—8-10 ft. A cut-leaf form of the above that looks like a fern, tropical in appearance and showy. 2-3 ft., 50c.

Typhina (Staghorn Sumac)—10-12 ft. A large shrub or tree much used in landscape background work. Brilliant red foliage in the Fall. 2-3 ft., 50c.

RHODOTYPOS

Kerrioides (White Kerria)—White. May and June. Very ornamental shrub with bright green, pleated leaves and large white flowers one-half to one inch across. These are produced in the ends of the branchlets and are followed by conspicuous shining black fruits that adhere practically all Winter. A desirable shrub. 18-24 in., 35c; 2-3 ft., 50c.

ROSA RUGOSA (Japan Rose)

Rugosa (Single Japan Rose)—Pink and white. May to September. Upright, hardy shrubs with very thorny branches. Leaves are dark green, pubescent and pleated. Flowers are frequently two inches across and very showy. The fruits (hips) that follow are also bright red and very ornamental. The plant is very desirable for massing and to get the best blossoms occasionally cut out the old wood to encourage new growth. 18-24 in., 50c; 2-3 ft., 75c.

RHODODENDRON

This, wherever known, is universally acknowledged to be the most showy, magnificent, hardy evergreen shrub that grows. Requires a sour or acid soil and it is more luxuriant in good, well-prepared soil of leaf-mold and muck and peat mixed, and in partial shade. The broad, thick evergreen foliage, with its glossy richness, would alone entitle it to a place foremost in the rank of evergreen shrubs; but when in June this mass of luxuriant foliage is almost hidden by the magnificent array of beautiful flowers in clusters, it is simply grand. Most effective when planted in large beds or groups so their flowers may be displayed in rich masses.

R. Catawbiense—Changes from delicate rose pink when opening to lighter shade when in full bloom. Large clump, \$4.00.

R. Maximum—Bears white flowers in June. Nothing produces a more attractive result than this plant when used for natural effects along walks and drives, and for foundation planting in shady spots. Large clump, \$4.50.

SPIRAEA

An indispensable class of small to medium size shrubs, embracing a wide range of foliage, habit of growth, color of flowers and season of blooming. Unsurpassed in beauty. Easy of culture and very hardy. Very satisfactory for single or clumping effect and planted more largely than any other flowering shrubs. The bloom period of the different sorts extends from May till September.

S. arguta. 4 to 6 feet. Of dwarf, slender, graceful habit; foliage fine, light green; blossoms very early, last of April or first of May. 18-24 in., 35c; 2-3 ft., 50c.

S. Anthony Waterer. 2 to 3 feet. An improved variety of this type; dwarf, upright grower, covered from June or July until fall with large heads of dark crimson flowers. Darker than Bumalda. A valuable addition to the list. 18-24 in., 50c.

S. Billardi 4 to 6 feet. Medium sized, upright grower with spikes of rose-colored flowers in July. 2-3 ft., 35c.

S. Billiardia Alba. Similar in foliage to Billardi except it has a white blossom. Hardy. 2-3 ft., 50c; 3-4 ft., 60c.

S. Bumalda. A handsome variety from Japan. Dwarf in habit and of vigorous growth. Foliage narrow; flowers rose-colored and borne in great profusion. Blossoms a long time. 18-24 in., 35c; 2-3 ft., 50c.

S. callosa alba (Dwarf White Spirea). 2 to 3 feet. Similar in habit and growth to Anthony Waterer. The blossoms, however, are pure white; a free and continuous bloomer. Works in very nicely in borders with Anthony Waterer. 18-24 in., 35c.

S. callosa rubra. Has large panicles of deep rosy blossoms, grows freely and blooms nearly all summer. 18-24 in., 35c.

S. Douglasi (Douglas's Spirea). A beautiful variety with spikes of deep rose-colored flowers in July and August. 18-24 in., 35c; 2-9 ft., 50c.

A. Waterer Spiraee

S. Froebel Spirea (S. Froebeli) Of the Anthony Waterer type, but more sturdy in habit. Canes distinctly reddish; young foliage tinged red; flowers rose color. Brilliantly colored in autumn. 12-18 in., 40c; 2-3 ft., 50c.

S. Opulifolia (Ninebark). Grows upright, attaining 8 to 10 feet. Bears white flowers in June. Old flower heads turn to a dark red and make a striking variety of colors at different stages of maturity. 2 to 3 ft., 40c; 3 to 4 ft., 60c.

S. opulifolia, var. aurea. 6 to 8 feet. Very much like the former, except that the foliage is yellow in spring, changing to golden bronze in autumn. 2-3 ft., 35c; 3-4 ft., 50c.

S. prunifolia fl. pl. (Bridal Wreath). 4 to 5 feet. A fine variety with plum-like leaves. The branches are covered in May with small, double white flowers. Is in bloom for some time. 2-3 ft., 35c; 3-4 ft., 60c.

S. sorbifolia. Of a vigorous species with leaves like a mountain ash, and long, elegant spikes of white flowers in July. 2-3 ft., 35c.

S. Thunbergii. Forms a dense feathery bush, 3 to 5 feet high. Foliage changes to bright scarlet shades in autumn. 18-27 in., 25c; 2-3 ft., 50c.

S. Van Houttei. This is undoubtedly the most charming and beautiful of all the varieties having pure white flowers in clusters, the branches drooping to the ground. Foliage a rich green. Very profuse in bloom and plants remarkably hardy. An indispensable ornament for lawn or hedges. The variety most commonly planted. Commonly called Bridal Wreath. 2-3 ft., 35c; 3-4 ft., 50c.

SNOWBERRY—(Symphoricarpos)

These are especially valuable for planting in the shade and in undergrowth.

S. Racemosus (Snowberry). 3 to 4 feet. Flowers small, pink, in June or July; foliage dark green; berries large, white, and hang well into winter. 2-3 ft., 25c; 3-4 ft., 35c.

S. vulgaris (Indian Currant, Coral Berry). 3 to 4 feet. Similar to Snowberry, except berries are smaller and are red. 2-3 ft., 25c; 3-4 ft., 35c.

TAMARIX

Shrubs of strong but slender delicate growth similar to the asparagus. Their pink flowers, finely foliage and gracefulness make them one of the most desirable shrubs for background or inter-planting. Will grow in poor, dry soil where other shrubs fail.

Aestivalis. (F) 6-7 ft. Pink. June. This species has bluish gray foliage, carmine pink flowers, and also blooms late in the Summer. 3-4 ft., 60c.

Africana. 7-10 ft. Deep pink. April and May. This is the most vigorous of any. Sea green foliage and pink flowers; blooms early. 3-4 ft. 35c.

Amurensis. 6 to 8 feet. A very beautiful shrub, with small leaves somewhat resembling those of the juniper, and delicate, small, pink flowers in spikes. The hardest Tamarix, 3-4 ft. ,35c.

Hydrangeas

VIBURNUM (The Snowballs)

In this group are some of the most conspicuous shrubs for blossoms, berries or autumnal foliage we have. They are all hardy, vigorous and healthy. For individual specimens or shrubbery orders they are desirable. Most of them will grow in partial shade but do better in the sun.

V. dentatum. Has glossy green foliage, white flowers in June; crimson berries turning blue in autumn. One of the best shrubs for landscape planting. 2-3 ft., 35c; 3-4 ft., 50c.

V. lentago (Sheepberry). Grows 20 to 30 feet high, white flowers in cymes in May and June. Large oval blue-black fruit in autumn. 2-3 ft., 35c.

Lantana (Wayfaring Tree)—(F.) 10-12 ft. White. June. A large, vigorous shrub with soft, heavy lantana-like leaves and large clusters of white flowers in May, succeeded by red berries which turn black as they ripen. 2-3 ft., 50c; 3-4 ft., 60c.

Opulus (High Bush Cranberry)—8-10 ft. White. May. Strong, rather spreading habit with single white flowers borne in flat clusters. The very showy red fruit which follows and the beautiful coloring in the Fall go to make it one of the best. 2-3 ft., 35c; 3-4 ft., 60c.

Plicatum (Japanese Snowball)—6-8 ft. White. May. This species is one of the most satisfactory shrubs grown. Its pure white double blossoms with a setting of dark pleated leaves and perfect form make it one of the best. Fine for an individual specimen or in groups. 2-3 ft., \$1.00.

Sterile (Old-fashioned Snowball)—10-12 ft. White. May. This old-fashioned variety is well known to every lover of plants. Its balls of pure white literally cover the bush when in bloom. 2-3 ft., 50c.

WEIGELA—(Diervilla)

The Weigelas are shrubs of erect habit while young, but gradually spread and droop as they acquire age; flowers are large, trumpet-shaped, of all shades and colors; very effective for grouping and borders; blossoms are produced in June and July.

Candida—Flowers pure white produced in June and continue to bloom nearly all summer. 2-3ft., 35c.

Eva Rathke—Flowers a brilliant crimson; a beautiful clear, distinct shade. 2-3 ft., 60c.

Rosea—An elegant variety with fine rose colored flowers appearing in June. 2-3 ft., 35c.

Variegated (Nana variegata).—This is perhaps second to no other hard-wooded plant with variously colored leaves. It stands the sun well and retains its well marked tints until Autumn. The flowers are lighter in color than the Rosea, but it is equally as free in bloom. 2-3 ft., 35c; 3-4 ft. 60c.

Weigela

Krider Nurseries, Inc.

"Received the bulbs in fine condition, am awfully pleased with them. Thanking you for the fine bulbs and wishing you would send me your next catalog, I remain,
Mrs. Wyman Williams, Indiana.

HARDY FLOWERING PLANTS

Perennial flowers give the satisfaction that comes from permanency. Year after year without any special care they bloom for you. If varieties are selected with regard to time of blossom flowers from early spring to late fall may be had. Remember the old-fashioned garden of your grandmother?

Price of all Perennial Clumps—Each 20c; per doz \$1.80; per 100, \$15.00. Select as many varieties as you like to make up your dozen or hundred.

ACHILLEA (Milfoil or Yarrow.)

Plants suitable for dry, sunny places. The dwarf kinds are useful for carpeting or for rockeries; the taller varieties as border plants.

Millefolium roseum (Rosy Milfoil). July to October. Rosy pink flowers in dense heads, on stems 18 inches high. Effective on edge of shrubbery or in border.

Ptarmica, The Pearl. Pure white, double flowers all Summer. Prized for cutting.

ALYSSUM (Rock Madwort). Very popular for beds, borders and Winter flowering; of easiest culture and very free blooming.

ANCHUSA (Alkanet). For producing a mass effect of brilliant blue the Anchusas cannot be surpassed.

ANTHEMIS (Marguerite) **Tinctoria.** Handsome, finely cut foliage, and large, golden yellow flowers produced all Summer. Succeeds in the poorest soil.

AQUILEGIA (Columbine). As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose.

ARTEMISIA (Sage Brush) **Lactiflora.** A tall growing plant of fine foliage and heads of small white flowers in August and September, which fill the garden with fragrance. A splendid and graceful cut flower.

ASTERS, Hardy (Michaelmas Daisies). These are among the showiest of our late flowering hardy plants, giving a wealth of bloom during September and October.

ASTILBE (Spirea.) These stately Astilbes producing their graceful feathery spikes of flowers during June and July succeed best in a partially shaded position in rich, preferably heavy soil where they will not lack for moisture.

CAMPANULA (Bellflower.)

A large and varied family of the greatest value. They are of the easiest culture, thriving in any ordinary garden soil.

Medium (Canterbury Bells). Blue, rose, white.

CHRYSANTHEMUMS

Hardy Chrysanthemums. The inclusion of Hardy Chrysanthemums in your plantings makes it possible to have the garden bright with flowers after the majority of hardy herbaceous flowers are past. They are also valuable for cut flowers. The varieties offered below have been carefully selected and will give a flowering period of two months, from the middle of September until the middle of November.

Chrysanthemum maximum (Giant Moonpenny or Shasta Daisies.) Alaska. Extra large.

COREOPSIS (Tickseed) **Grandiflora.** An improved variety with large, bright yellow flowers; one of the best hardy plants. Fine for cut flowers all Summer long.

DELPHINIUM (Larkspur). Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. They will bloom from Spring till Fall.

DIELYTRA OR DICENTRA (Bleeding Heart). A hardy perennial with heart-shaped, rose-colored flowers in drooping spikes. Each 35c.

DIGITALIS (Foxglove). For stately and picturesque beauty it is not to be surpassed, and, planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchards or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial.

DIANTHUS (Pinks). **Hybrid Garden Pinks.** Without the spicy fragrance of the Hardy Pinks a garden is incomplete. Their perfect form and rich coloring make them great favorites for Summer bouquets. June.

***DIANTHUS barbatus** (Sweet William). Old favorites, bearing their sweet, clove-scented flowers in the greatest profusion during May and June. Indispensable for the hardy border and for cutting.

GAILLARDIA grandiflora (Blanket Flower). Base of petals are scarlet-crimson, bordered golden yellow. A most beautiful combination; useful in assorted bouquets; valuable for table decoration.

Gypsophila paniculata (Baby's Breath). A beautiful old-fashioned plant possessing a grace not found in any other perennial and attracting the eye of everyone.

Hemerocallis (Yellow Day Lily.) **Hemerocallis** have long been favorites in our garden, and are always included in any list of the most popular hardy plants.

Hibiscus—Mallow Marvels. Improved new hardy giant-flowering Marshmallows, the most free-blooming of all perennials; rich, gorgeous and hardy as an oak.

HOLLYHOCKS

The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect.

The Krider Nurseries, Inc.

"Will you please send me your 1926 Nursery catalog and price list. I bought some trees from you last year and I am well pleased with them. Hope to hear from you soon."

Yours truly,

Ira W. Owings, Missouri.

Iris Kaempferi (Japanese Iris). The magnificent Iris Kaempferi in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

German or Flag Iris. The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it.

LATHYRUS (Everlasting Sweet Pea.)

Latifolius. These Everlasting Peas are but little known in this country, but are great favorites in England. They are extremely showy and fine. Charming climbers for covering trellises, arbors, etc.

Liatris (Blazing Star or Gay Feather) It blooms in midsummer and throws up long, narrow spikes of rich purple flowers, which last a long time.

Hardy Phlox—Perennial Phloxes succeed in almost any soil. Ten shades of the most striking colors.

Plumbago (Leadwort.)—One of the most desirable border and rock plants. It is of dwarf, spreading habit, growing 6 to 8 inches high, covered with deep blue flowers during the summer and Fall.

Platycodon (Balloon Flower) —June to October. Large, showy, deep blue flowers. Good for rock garden and border.

Hollyhock

PEONIES

The finest list in Indiana to choose from. Peonies may be planted in the Spring or Fall with equally good results. We planted an acre last Spring that were in full bloom on June 5th to 10th. They will not bloom quite as early the same season they are planted as they will the second year.

We offer the following varieties at prices offered in good 3 to 5 eyes that will bloom the first season. We purchased our original plantings from the best Peony experts and we paid much more than we ask for same. Price of peonies each 60c; per doz., \$6.00.

Festiva Maxima

White

Alice Roosevelt (Terry)—White, large and fragrant, center petals rosy purple, center cream, shading white.

Esther (Terry) — White, outer petals rose, very fragrant, like a rose, one of Terry's best.

Elsie Lapworth (Terry) — White, large, globular, outer petals tinted rose tipped white, base straw color, very fragrant.

Festive Maxima—White, the best of all early white for cut flowers.

Golden Harvest—(Rosenfield)—Medium size, pale pink to creamy white, rather dwarf, but A-1 in every respect.

Papivafiora — Cream, center white.

Red

Felix Crousse—Red, a leader for cut flowers, very showy. 75c each.

Emperor William—Best of all reds, very fine, blooms profusely, superior to Felix.

Edouard Andre—Dark red, early fine.

Grover Cleveland—Deep crimson, large globular type, fringed.

General Miles (Terry)—Brilliant red, large, globular and robust.

Karl Rosenfield—Dark red, very fine, midseason.

Louis Van Houtte—Dark red, very free, tall, good for cutting.

Rubra Triumphans—Dark crimson, early midseason.

Rubra Superba (Richardson)—Rich, red, free, large flower; superior in every way; midseason.

Victor Hugo—We consider this the handsomest Peony on our list; dark red, very dazzling and changeable colors.

Purple Red—Red, similar to Felix Crousse.

Pink

Duchess of Orleans—Deep pink, standard for midseason. Very fine.

Delicatissima—Fine pink for cutting.

Edulis Superba—Best early pink, fine for decoration, good commercial sort.

General Sheridan (Terry)—Globe; deep pink, tip white; vigorous and free. A-1.

Mme. Ducel—Salmon, rose, midseason, very fine.

Mons Jules Elie—Pale rose, very fine, early sort.

Unnamed—Red, pink, white, flesh or mixed at 35c each; 3 for \$1.00.

RUDBECKIA—(Coneflower)

Tall growing plants blooming profusely all Summer.

SEDUM—(Stonecrop.)

Spectabile. One of the prettiest erect-growing species, attaining a height of 18 inches, with broad, light green foliage and immense heads of handsome, showy, rose colored flowers; indispensable as a late Fall-blooming plant.

TRITOMA (Red Hot Poker; Flame Flower; Torch Lily)

Pfitzeri (The Everblooming Flame Flower). The free and continuous blooming qualities of this variety have made it one of the great bedding plants.

YUCCA (Adam's Needle).

Filamentosa. Among hardy plants there is nothing more effective and striking for isolated positions on the lawn or on dry banks where few other plants thrive.

BULBS

TULIPS

For those early spring blossoms that make you gasp with delight from their sudden bursting forth after the blanket of snow has scarcely disappeared, you will want a few crocus, narcissus and tulips. Our varieties are unexcelled. Get the best and have them bloom the first year.

There are no bulbs which make such a rich and gorgeous display of blossoms with so little care and cultivation as do Tulips. Their early blooming, pretty cup-like flowers, gay colors, and brilliant effects make them spring favorites.

Single early tulips. Ten different colors. Very showy. 50c per doz.

Double early tulips. Double tulips have mammoth peony-like flowers of brilliant and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties. 50c per doz.

Single late or show tulips. This class of tulips is becoming more popular each year. Late or show tulips make one of the best, brightest and most attractive and satisfactory flowers for the table. Per doz. 50c.

Darwin Tulips. ("The Tulip Aristocrats.") The flowers of this superb class have well been called "The Tulip Aristocrats." The remarkably brilliant coloring and splendid substance of their distinctly globular or cup-shaped flowers of large size, their long, strong stems, and robust growth of plant make them unsurpassed for May blooming in the garden. Per doz. 75c.

DUTCH HYACINTHS

Hyacinths are among the most popular and satisfactory flower bulbs grown. Their wax-like bell-formed flowers, borne in buxom trusses, are of matchless beauty and also delightfully fragrant. The colors, shades, and tints are wonderfully varied, ranging from purest white, through blush, pink and rose, to deepest red, from daintiest porcelain through blues to black purple, and from cream through yellows to orange and rosy apricot. 18c each; per doz., \$2.00.

CROCUS

Among the earliest to blossom in spring is this beautiful little flower, lifting its head almost before the snow has disappeared. Absolutely hardy for outdoor culture and may be used for pot culture. 50 per doz.

JONQUILS

(**Miniature Narcissus**) A slender and graceful species with rather small, bright yellow, sweet-scented flowers, abundantly produced on stems about a foot long, each bearing a cluster of florets. 50c per doz.

PAPER WHITE NARCISSUS

The beautiful flowers are pure white, very fragrant and borne in clusters. 50c per doz.

Narcissus

Krider's Hardy Northern Grown Roses

ALL THE NEWEST—ALL THE FINEST

All prices on 2 year old, field grown stock

Roses are undoubtedly the richest and most luxurious of all flowers. No garden or greenhouse is complete without them, on account of their loveliness. Many people think that it requires a southern climate to make them grow successfully. Not so. Hardy field-grown Roses such as Krider's will be a riot of luxurious loveliness if only a little care is used in choosing the soil and keeping off the Rose pests.

A clay soil is needed for the best success. Spraying with Black Leaf 40 in an ordinary hand sprayer is usually sufficient to control insects.

Krider's northern field-grown Roses are exceptionally hardy. From the list given here any Rose connoisseur will know that only the rarest and most beautiful kinds are offered. The kinds that bring a thrill to you when the blossoms open, the kinds that bring envy to your neighbors and the never-omitted query, "where did you get it?" Send us a sketch of your yard and let our landscape department plan a Rose Garden for you.

HARDY EVERBLOOMING ROSES

Red Roses

American Beauty. Conceded to be the most grandly beautiful of all Roses in size, form and color. Rich red, passing to crimson, delicately veined and shaded; fragrant. 75c each.

General Jacqueminot. One of the most popular of the red Roses; brilliant crimson, large and very effective; very fragrant and one of the hardiest. 75c each.

Gruss an Teplitz. Flowers dark, rich crimson, passing to fiery-red as they mature; one of the brightest colored Roses; large, full and sweet; vigorous grower and very hardy. 50c each.

Marshall P. Wilder. Bright cherry red; of good size; very fragrant and perfectly double. Plant is a vigorous grower and continues long in bloom. One of the very best of its color. 50c ea.

Radiance (Cook, 1909)—A brilliant rosy-carmine, displaying rich and opaline-pink tints in the open flower. \$1.00 each.

Ulrich Brunner—Seedling from Paul Neyron. Extra large, bold flowers; full and globular, very fragrant; petals large and of good substance; color rich, glowing cherry, elegantly mingled with scarlet. Vigorous, healthy and blooms freely. One of the best and finest hardy Roses. 50c each.

White Roses

Frau Karl Druschki—Snow white, very large, perfect form. A vigorous grower and free bloomer. Bright, heavy foliage. 50c each.

Killarney White. HT. A pure white sport of the old pink Killarney. 75c each.

Kaiserin Augusta Victoria. Pure white, does not pink when planted out; splendid, large buds and superb, full double blooms. A most sturdy grower, blooming steadily from early spring till late frost. 75c each.

Madame Plantier (H. P.)—Pure white, above medium size; full. Produced in great abundance early in the season. Foliage rather small, seven leaflets. One of the best roses for groups. 75c each.

Margaret Dickson. A very free grower, foliage large and dark. Flower white, with pale flesh center; petals are thick and bell-shaped, quite fragrant; a fine sort. 75c each.

Pink Roses

Bridesmaid. Clear, bright pink; a constant bloomer; large, full and globular; one of the finest Teas. Very fragrant. 50c each.

Columbia. A new Rose. A large fully double Rose. Pink. Of lasting qualities. Very vigorous grower. \$1.00 each.

Mme. Caroline Testout—Strong vigorous plants. The large, rounded flowers are bright satiny rose, with darker center, and edges of petals bordered with soft carmine-pink. 75c each.

Maman Cochet. Pink. Rich, rosy-pink, shaded silvery-rose on outer petals; exquisite in color and graceful in form from bud to bloom, and delightfully fragrant; beautiful, healthy foliage and long, stiff stems. 75c each.

Mrs. John Laing—This Rose is a silky pink, which shows different in varying lights. Finely formed, large, double, very sweet flowers, on long stems. The quick growing bush blooms nearly equal to the monthly Roses. One of the best Hybrid Perpetuals for all outside purposes, also desirable for forcing. 50c each.

Paul Neyron—The largest Rose in cultivation. Sometimes called the Peony Rose. Color light, smoky rose; flowers are very double and full, delightfully fragrant. The plant makes a strong, healthy growth and has clean, glossy foliage. Blooms very good from June until late October. 50c each.

Yellow Roses

Betty—Glorious coppery rose, overspread with golden yellow. Ea. \$1.

Clio—A large, globular rose; sweetly fragrant; of satiny flesh color, with a pink center, which, when two-thirds open, is perfectly cup-shaped. The beauty is enhanced by a rosette of foliage about it. 75c each.

Golden Gate. A beautiful yellow Rose, very double and full; fragrant; rich cream-white tinged with golden yellow; constant bloomer. 50c each.

Lady Hillingdon—The wonderful color of this beautiful rose is equalled by none. It has long, willowy stems that are in no sense weak, as the buds are held upright; has a long, slenderpointed bud of brilliant deep golden yellow, improving in color as the flower matures. Awarded gold medal. 75c each.

Miss Lolita Armour. Chrome-yellow at the base, shading to orange and copper hues on the reverse of the petals, and with much of the characteristic copper and shrimp-pink tints in its make-up. \$1.00 each.

Orphelia—(Wm. Paul & Son, 1924)—A rose that is admired by everyone; its flowers are held erect on long, stiff stems, are of perfect form, good size, and of a most pleasing delicate tint of salmon-flesh, shaded with rose; very floriferous. 75c each.

Sunburst. Orange-copper or golden orange; all intense shades, giving an extremely brilliant effect. A giant rose, long stems, long, pointed buds; vigorous, free and healthy. \$1.00 each.

Soleil D'or (Sun of Gold)—A strong, hardy Rose; large, full and double; golden orange yellow tinged with red and rosy pink; a magnificent Rose. 50c each.

Los Angeles—One of the most notable American garden roses. Its color is luminous flame pink, toned coral, shaded translucent gold at base of petals. An upright, sturdy grower, bearing perfect, fragrant flowers on strong stems. Desirable in every garden. \$1.00.

We grow many other varieties of roses, but the above are our selection out of the many hundred kinds. We have tried these out in Northern Indiana and find them especially suitable. They flourish, bloom profusely, and are just a little "different" from some of the more common kinds. A rose garden selected from this list will cause your neighbors to inquire, "where did you get them?"

BABY RAMBLERS AND POLYANTHA ROSES

A type of Rose which is very popular for bedding purposes. They form shapely, compact, bushy specimens about 18 inches high, producing a great profusion from early in the season until severe frost, immense trusses of small flowers. Pruning is not necessary; simply remove the past season's flower stems. Each 60c; 3 for \$1.50.

Baby Tausendschoen — We have Baby Rambler, daddy of them all. It is in bloom all the time, flowers in large clusters of brightest crimson. It grows to a height of eighteen inches and hides the plant with its bloom. A most wonderful Rose.

Baby Tausendschoen — We have nothing lovelier in Roses than this Dwarf Polyantha with its beautiful bouquets of creamy white, saucer shaped flowers, every petal edged with lovely rosy pink. One of the most beautiful of pot Roses.

"Baby Ramblers"

George Elger—A lovely little yellow Polyantha Rose with a good mixture of Tea blood. Like all of its class, it is free in growth, free in bloom, with small glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety.

Catherine Zeimet—This is the new White Baby Rambler. A continuous blooming Rose of great merit. Fine for bedding.

Erna Teschendorff—The much heralded variety from Holland. Color, brilliant dark carmine-red, and is darker than Rad Baby Rambler. Very free flowering.

HARDY CLIMBING ROSES

Climbing American Beauty—Flowers of large size, good form, of rich, red color passing to crimson. Very fragrant. Good foliage and absolutely hardy. 2-yr., 50c.

Dorothy Perkins—Beautiful shell-pink, which holds for a long time, shading to a lovely deep rose. Very sweetly scented, hardy and a strong grower. 2-yr., 50c.

Dr. W. VanFleet—This new Rose has a great future. In flower and foliage it is all that could be expected of a climbing Rose. Blossoms extra large resembling the tender Hybrid Tea Roses in shape and size. Its strong stems are 12 to 18 inches long, making it valuable for cutting. In color a delicate flesh pink changing when full blown to a flesh white shade. 2-yr., 50c.

Excelsa or Red Dorothy Perkins—Intense crimson scarlet. Double flowers in brilliant clusters set in glossy green foliage. Extremely vigorous and one of the handsomest of all climbers. 2-yr., 50c.

Paul's Scarlet Climber—An entirely new variety, combining vigorous growth, wonderful foliage and absolute hardiness, together with flowers almost as large as those produced on bush Roses; in color a brilliant scarlet which lasts well. 2-yr., 75c.

Flower of Fairfield (Everblooming Crimson Rambler) — Brilliant crimson. Flowers almost continually in brilliant clusters from early Summer until frost. 2-yr., 50c.

Crimson Rambler—One of the most popular of the climbers. A rapid grower and perfectly hardy; flowers in rich clusters of vivid crimson. One year plants will attain a height of 10 to 20 feet in a single season and the second year they will produce a marvelous profusion of their rich glowing crimson flowers. 2-yr., 50c.

Tausendschoen (Thousand Beauties)—Varying in shade from a delicately flushed white to a deep pink or reddish crimson, in bright clusters, almost covering the handsome green foliage. A climbing Rose that comes to us from Germany. It gets its name from its many flowers and from their variation in coloring. 2-yr., 50c.

White Dorothy Perkins—A pure white sport from Dorothy Perkins, with which it is identical in variety and habits. A valuable addition to the hardy climbing class. The plant is a strong, rampant grower, covering a large porch or trellis in a remarkably short time. 2-yr., 50c.

American Pillar—Verv large, handsome flowers of light, bright crimson, with a clear white eye surrounding numerous golden yellow stamens. These flowers fade to an agreeable light pink and are in great clusters. A superb. 2-yr., 50c ea.

KRIDER'S QUARTER CENTURY BARGAIN SPECIALS

Out of our feeling of gratitude to our customers who have helped us build up our Nursery from a very small beginning twenty-five years ago to our present goodly organization, comes a desire to in some way reward you for your assistance, because without your patronage our business could not have thrived. True, we have always tried to give every one of you hardy, thrifty stock so that you would get just a little more for your money, since a satisfied customer is our best advertisement.

But we wish to celebrate our 25th Anniversary with something special in addition to our regular money saving values that we ordinarily give you. So below we are offering three specials. We believe that never before have such money savers been offered in No. 1 first class, high quality stock. Our wish is that one or more of these may meet your needs.

KRIDER'S LANDSCAPE SERVICE

A great many people are in the position of wishing to beautify their homes and of not knowing just what to plant nor how to arrange their plantings. They are realizing that there is a tasteful way of setting shrubbery and of placing trees and flower beds and arbors so as to produce an artistic effect and enhance the beauty of the home. That an opposite effect may be produced they have also noticed.

For people who have not the services of a local landscape man, Krider's are offering a service. This service is given to prevent costly mistakes; to guide in the selection and arrangement of shrubs that will be best suited to your type of home and grounds; and to aid you in bringing out the best that is in your location and surroundings.

In reality we do not charge for the services of our landscape architect. You will easily realize that no skilled architect could study out a setting for your grounds to say nothing of making you a sketch locating shrubs, trees, flowers, arbors, etc., for the sum we charge. Obviously we can offer such service only to our customers. So we make the nominal charge of \$2.00 merely to prevent being asked to give this valuable service to those who have no intention of buying from us. And that \$2.00 is credited on your order, when you purchase of us.

Make your sketch complete. Be sure to mark every distance plainly; not only each dimension of the house but the distances from each lot line, the width and length of walks, the location of all trees, fences, garages and other buildings. Also give us an idea of the neighboring lot borders and views so that if there are any buildings or other objects that should be screened we may so plan it. In other words give us enough details so that we may get a picture of your house and surroundings. The better picture you give us on the order blank the better sketch we will be able to give you.

Further, we design plans for public buildings, golf courses, subdivisions, cemeteries, etc. We will be glad to send a landscape man to work with you and to go over any problems with you. Our charge for this work is reasonable.

Write us and let us work with you for more beautiful living conditions.

Young Evergreens in Our Nursery

ORDER BLANK FOR LANDSCAPE WORK.

The Krider Nurseries, Inc.

Middlebury, Indiana

Landscape Department

Vernon H. Krider, Manager.

O. E. Cassady, Sec'y.

Ray S. Berlin, Landscape Architect.

GENTLEMEN:—On back of this sheet is a sketch of my home and grounds. Enclosed find \$2.00 currency or check as per your offer in your catalog. For this sum I am to receive a plan for the landscaping of my grounds and this \$2.00 is to be credited on my order for shrubbery provided my order amounts to \$25.00.

Name

Address

Kind of Home (bungalow, cottage, colonial)

Material (brick, stucco, frame?)

One story or two?

Height of foundation above ground?

Material in Foundation?

Do you wish formal effect or natural?

Do you prefer evergreens?

Do you wish fruit trees?

Do you wish a vegetable garden?

Do you wish a flower garden?

Would you like a hedge?

About what sum have you set aside for landscape work?

(This last question is important for it will determine the size and kind of shrubbery the elaborateness of the design, and the effect that is given. There is as much variation in the price of the different kinds of rare shrubs and flowers and trees as in the prices of ladies dresses.)

NOTE:—Our aim is to give you a plan to work to; a plan that when it is completed will give you an artistic and beautiful effect; one that will add to the completeness and finish of your home. We have set hundreds of homes and churches and schools and will give you the benefit of our years of experience so that you will not make errors that will be costly to change. (See our page on landscape service.)

(5 Months Old Kreider Planting at Mishawaka, Indiana High School.)

USE THIS SHEET WHEN SENDING US YOUR SKETCH

Remember Your sketch should give all the principal dimensions, location of drives, walks, buildings, trees and all permanent objects. It should give the directions North, South, East and West, good or bad views, and should show all grades of any importance.

Be Sure that Every Distance is Given Exactly.

QUALITY PAYS

In buying any article there is a limit below which first-class goods cannot be sold. A pair of shoes may be bought, for instance, at a price anywhere from \$2.00 up to \$15.00. Now somewhere along the line a good all leather shoe can be purchased for \$5.00 or \$6.00. Above that you pay for style, and finish. Below that the quality must be cut, cheaper leather, or paper filler, that keeps the shoe from giving full service.

So in Nursery Stock. There is a price for good vigorous, sturdy stock. Below that price quality must be sacrificed.

Below is a picture of our Main Offices and packing plant. Here we have our green house, where we propagate all our stock, and our large cold storage plant. Visiting nurserymen have complimented us on our very modern equipment and facilities for handling nursery stock in the most approved methods.

Krider Nurseries is located at Middlebury, a thriving town in Northern Indiana. We are right in the heart of a very good fruit growing section in the state and within easy access to all fruit growers in the central states. The rapid development of Northeastern Indiana stretching from Chicago eastward, and the tremendous demand for Landscape Service makes our plant the ideal one to serve you quickly and efficiently. The photos in this catalogue taken of glimpses of our nurseries, give some indication of the beauty and thriftiness of our nursery stock.

Owing to the nature of our sandy loam soil, trees and shrubs develop **VERY FIBROUS ROOT SYSTEMS**. To this one thing we attribute the extra large percentage of plants that grow and thrive for our customers. One Indianapolis firm which purchased a thousand 12-18" evergreens reported 100% lived.

Now the difference in cost between a poor tree and a cheap tree is only a few cents. For instance a No. 1—3 year old apple tree is \$60.00 per 100 or 60c each. Perhaps you might buy trees for 35c each, a saving of 25c; but if the 60c tree will bear a crop a year sooner and, being larger and better, will bear more fruit, is it a quarter saved?

Special Quarter Century Rose Bargains

Any Six 50c Roses \$2.50

Any Six 75c Roses \$3.25

Any Six \$1.00 Roses \$4.75

All hardy 2-year field grown stock, sure to bloom the first season. This offer good while our stock lasts.
